of education technology and its political financial and social impact on higher education and our world From AI tutors who ensure individualized instruction but cannot do math to free online courses from elite universities that were supposed to democratize higher education claims that technological innovations will transform education often fall short Yet as Anne Trumbore shows in *The Teacher in the Machine* the promises of today's cutting edge technologies aren't new Long before the excitement about the disruptive potential of generative AI powered tutors and massive open online courses scholars at Stanford MIT and the University of Illinois in the 1960s and 1970s were encouraged by the US government to experiment with computers and artificial intelligence in education Trumbore argues that the contrast between these two eras of educational technology reveals the changing role of higher education in the United States as it shifted from a public good to a private investment Writing from a unique insider's perspective and drawing on interviews with key figures historical research and case studies Trumbore traces today's disparate discussions about generative AI student loan debt and declining social trust in higher education back to their common origins at a handful of elite universities fifty years ago Arguing that those early educational experiments have resonance today Trumbore points the way to a more equitable and collaborative pedagogical future Her account offers a critical lens on the history of technology in education just as universities and students seek a stronger hand in shaping the future of their institutions

[The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances \(Volume 2 of 2\)](#) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within

Harter, PhD, 2015-07-12 With trepidation Dr Robert D Harter approached the subject of Earth origins and human development from the position of a lifelong Christian who is also a scientist He grew up in a rural Ohio Christian family and thoroughly understands the position of those who believe the Earth and everything in it was created a few thousand years ago At the same time he is a university professor who understands the basis upon which the Earth is

claimed to be millions of years old Both positions cannot be correct and it is probable that neither is completely wrong Using a scientist s analytical approach Dr Harter evaluated and compared biblical anthropological and geological records In Scripture Versus Science he proposes a resolution to the increasingly heated argument about evolution While unlikely to provide a clear and definitive answer this book begins to thin the fog that has developed around it He states There has been a lot of fog associated with whether God created the universe and everything in it or whether it just happened by chance In writing this book I attempt to show that the ideas supporting the two views are not necessarily mutually exclusive In other words I hope I have allowed a bit of sun to shine through the fog

Les réalités de la 'réalité' - deuxième partie: Vers une compréhension des facteurs responsables des progrès de la science moderne (Volume 2) Fritz Dufour, MBA' DÉSS,2019-03-23 La différence entre la première partie et la deuxième partie volumes 1 et 2 de cette série est que dans la première partie l'auteur a montré comment ce que nous appelons la réalité commence avec le moi intérieur alors que la deuxième partie décrit ce qui en réalité affecte et modifie l'environnement ou la réalité et quels sont les facteurs derrière cette dynamique Ce qui impacte et modifie l'environnement c'est la science Ce volume 2 commence par montrer comment la technologie joue un rôle important dans les progrès scientifiques Bien que la relation entre les deux soit symbiotique la science peut exister sans technologie mais la technologie a désormais besoin de la science La technologie militaire est un exemple de la manière dont la technologie peut faire progresser la science Certaines inventions militaires finissent par avoir un usage civil La science tant au centre de la société le livre plaide en faveur de l'impact direct de sciences sociales telles que la politique et l'économie sur les progrès de la science La politique dit l'auteur influence la science en raison de l'incertitude de la science et l'économie le fait grâce la disponibilité de fonds pour les chercheurs et les scientifiques D'autre part le gouvernement influence également les progrès scientifiques par le biais de réglementations Le livre donne comme exemple la régulation du cyberspace En outre en montrant comment l'art influence la science l'auteur plaide en faveur de l'aspect polyfactoriel des progrès scientifiques Dans cette optique il prouve également que des facteurs tels que le scepticisme la curiosité et la quête du savoir influencent grandement les progrès de la science Cela dit l'auteur est un virage 90 degrés En terminant la deuxième partie de cette façon je voulais d'une manière ou d'une autre la relier à la première partie qui affirme que la réalité commence de l'intérieur
