

millions of forest were destroyed, this is about the same as one mighty Pacific NW SA destroyer. That if we carry on like this rainforests will be lost in less than 100 years.

Why is the rainforest being destroyed?

The rainforests are being destroyed to allow different people for farming. To allow trees to be used for their wood (for houses even firewood), to make way for new settlements or roads, to allow people to mine for coal or diamonds deep underground.

Increasing areas of the rainforests are cleared to allow farmers to farm their produce to sell in cities are raised for their beef. This is the highest cause of destruction through farming. Farmers also grow bananas, coconuts, coffee, oil palm trees, sugar cane and tea. These can make a lot of money for the farmers but destroy huge areas of the rainforest.

Logging: this makes up 14% of all deforestation world. Trees are sold on and used to build furniture or houses, or used to make paper.

Many other reasons to clear or areas of the rainforest. To attract the tribal people who still live there. However, this doesn't stop it from happening completely and it can cause conflict.
