The Making of Tests for Index Numbers Arthur Vogt, Janos Barta, 2013-03-14 Arthur Vogt has devoted a great deal of his scientific efforts to both person and work of Irving Fisher This book written with Janos Barta gives an excellent impression of Fisher's great contributions to the theory of the price index on the one hand On the other hand it continues Fisher's work on this subject along the lines which several authors drew with respect to price index theory since Fisher's death fifty years ago This is a highly instructive book on both the history and theory of measurement in economics It is rather a rich source of interesting properties of more or less well known indices and famous men especially Irving Fisher than a precise mathematical text on the axiomatic foundations of indices From the Foreword by Wolfgang Eichhorn
