Between War and the State Van Nguyen-Marshall,2023-07-15 In Between War and the State Van Nguyen Marshall examines an array of voluntary activities including mutual help professional charitable community development student women s and rights organizations active in South Vietnam from 1954 to 1975 By bringing focus to the public lives of South Vietnamese people Between War and the State challenges persistent stereotypes of South Vietnam as a place without society or agency Such robust associational life underscores how an active civil society survived despite difficulties imposed by the war government restrictions economic hardship and external political forces These competing political forces which included the United States Western aid agencies and Vietnamese communist agents created a highly competitive arena wherein the South Vietnamese state did not have a monopoly on persuasive or coercive power To maintain its influence the state sometimes needed to accommodate groups and limit its use of violence Civil society participants in South Vietnam leveraged their social connections made alliances appealed to the domestic and international public and used street protests to voice their concerns secure their interests and carry out their activities

The Runes of Evolution Simon Conway Morris,2015-06-30 How did human beings acquire imaginations that can conjure up untrue possibilities How did the Universe become self aware In The Runes of Evolution Simon Conway Morris revitalizes the study of evolution from the perspective of convergence providing us with compelling new evidence to support the mounting scientific view that the history of life is far more predictable than once

thought A leading evolutionary biologist at the University of Cambridge Conway Morris came into international prominence for his work on the Cambrian explosion especially fossils of the Burgess Shale and evolutionary convergence which is the process whereby organisms not closely related not monophyletic independently evolve similar traits as a result of having to adapt to similar environments or ecological niches In *The Runes of Evolution* he illustrates how the ubiquity of convergence hints at an underlying framework whereby many outcomes not least brains and intelligence are virtually guaranteed on any Earth like planet Conway Morris also emphasizes how much of the complexity of advanced biological systems is inherent in microbial forms By casting a wider net *The Runes of Evolution* explores many neglected evolutionary questions Some are remarkably general Why for example are convergences such as parasitism carnivory and nitrogen fixation in plants concentrated in particular taxonomic hot spots Why do certain groups have a particular propensity to evolve toward particular states Some questions lead to unexpected evolutionary insights If bees sleep as they do do they dream Why is that insect copulating with an orchid Why have sponges evolved a system of fiber optics What do mantis shrimps and submarines have in common If dinosaurs had not gone extinct what would have happened next Will a saber toothed cat ever re evolve Cona Morris observes Even amongst the mammals let alone the entire tree of life humans represent one minute twig of a vast and largely fossilized arborescence Every living species is a linear descendant of an immense string of now vanished ancestors but evolution itself is the very reverse of linear Rather it is endlessly exploratory probing the vast spaces of biological hyperspace Indeed this book is a celebration of how our world is and was populated by a riot of forms a coruscating tapestry of life *The Runes of Evolution* is the most definitive synthesis of evolutionary convergence to be published to date
