concepts using large and small print to distinguish need to know drug content from the material that is merely nice to know. New to this edition are quick reference summaries of prototype drugs, safety alerts, and a stronger QSEN focus. Written by noted nursing pharmacology instructors Jacqueline Burchum and Laura Rosenthal, this text helps you understand pharmacology as opposed to merely memorizing drug facts. UNIQUE Engaging writing style with clear explanations makes difficult pharmacology concepts easy to grasp and even enjoyable to learn. Large print highlights essential need to know information, and small print indicates nice to know information. A drug prototype approach focuses on one representative drug within each drug family that characterizes all members of its group so that you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. Nursing implications of drug therapy are integrated throughout the text and summarized at the end of chapters, demonstrating the vital relationship between drug therapy and nursing care. Reader friendly features make learning easier with concise drug summary tables, chapter outlines, key points, and a visual guide to the prototype drugs in each class. Learning resources on an Evolve companion website include video clips, animations, case studies, and NCLEX exam style review questions. Coverage of dietary supplements and herbal remedies describes potential dangerous interactions between prescribed and over-the-counter drugs and dietary supplements. NEW QSEN focus includes Patient-Centered Care Across the Life Span, features highlighting safe and appropriate patient care during different phases of life. NEW Safety Alert features emphasize the QSEN competency relating to patient safety. NEW Prototype Drugs features serve as a quick reference aid to learning. NEW Chapter outlines include page numbers to help you locate topics quickly.
