and spirit converge in a captivating exploration of the human body as more than mere biology Drawing from philosophy

theology medicine and biology this book challenges the view that life is the product of blind chance From the cellular dance

of regeneration to the breathtaking orchestration of body systems it reveals signs of purpose woven into the fabric of life

itself For the scientist the skeptic and the seeker alike this is an invitation to see the body not just as alive but as alive with

meaning I will praise thee for I am fearfully and wonderfully made wrote a grateful King David in Psalm 139 three thousand

years ago He didn't know the half of it In this marvelous book Dr Octavian Caius Obeada focuses on the marvelous ability of

life to regenerate and heal itself surveying what philosophers and theologians throughout the ages have surmised and

detailing the intricate molecular mechanisms that have been discovered by scientists only in recent decades The result is a

tour de force showcasing the intelligent design of life Michael J Behe PhD Professor of Biological Sciences at Lehigh

University in Pennsylvania and a Senior Fellow at Discovery Institute's Center for Science and Culture and author of Darwin

's Black Box The Living Signature by Dr Octavian Caius Obeada is a profound exploration of the human body's regenerative

capacity framed as both a scientific marvel and a philosophical clue to purposeful design Drawing on decades of medical

experience and insights from biology theology and systems thinking the book challenges reductionist views by asking

whether healing is merely mechanical or a message of intention With compelling case studies and a multidisciplinary lens

this work invites readers to see the human body not as an accident but as a living signature of meaning and design Adrian

Anthony Dormans MD FRCGS From skin and bone to organs and DNA the regenerative capabilities of the human body are

not only astonishing they hint at something deeper The Living Signature lays out thoughtful well researched reflections and

challenges you to consider whether the complexity and order we see in ourselves could truly be the product of blind chance

Posthuman Bliss? Susan B. Levin, 2021 A tightly argued and expansive examination of the pitfalls of transhumanism that reacquaints us with what it means to live well Advocates of transhumanism or radical enhancement urge us to pursue the biotechnological heightening of select capacities above all cognitive ability so far beyond any human limit that the beings with those capacities would exist on a higher ontological plane For proponents of such views humanity's self transcendence through advancements in science and technology may even be morally required Consequently the human stakes of how we respond to transhumanism are immeasurably high In Posthuman Bliss The Failed Promise of Transhumanism Susan B Levin challenges transhumanists overarching commitments regarding the mind and brain ethics liberal democracy knowledge and reality showing their notion of humanity's self transcendence into posthumanity to be little more than fantasy Uniting philosophical with scientific arguments Levin mounts a significant challenge to transhumanists claim that science and technology support their vision of posthumanity In a clear and engaging style she dismantles transhumanists breezy assurances that posthumans will emerge if we but allocate sufficient resources to

that end Far from offering theoretical and practical proof of concept for the vision that they urge upon us Levin argues transhumanists engage inadequately with cognitive psychology biology and neuroscience often relying on questionable or outdated views within those fields Having shown in depth why transhumanism should be rejected Levin argues forcefully for a holistic perspective on living well that is rooted in Aristotle's virtue ethics but that is adapted to liberal democracy This holism is thoroughly human in the best of senses It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation
