**Perfect Pairs, K-2** Melissa Stewart, Nancy Chesley, 2023-10-10 Hands on lessons can be fun and compelling but

when it comes to life science they aren't always possible, practical, effective, or safe. Children can't follow a lion as it stalks a gazelle, visit the exotic kapok tree in a rain forest, or swim alongside the underwater life in a pond. But they can explore a whole world of animals, plants, and ecosystems through the pages of beautifully illustrated science-themed picture books. **Perfect Pairs**, which marries fiction and nonfiction picture books focused on life science, helps educators think about and teach life science in a whole new way. Each of the twenty-two lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry-based investigative process to explore that idea from animal environment interactions to the role of structure in plant and animal survival, from inheritance of traits to variation of species. Each lesson starts with a Wonder Statement and comprises three stages: Engaging Students features a hands-on activity that captures student interest, uncovers current thinking, and generates vocabulary. The heart of the investigative process, Exploring with Students, spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables. Encouraging Students to Draw Conclusions shows students how to review and analyze the information they have collected. Bringing high-quality science-themed picture books into the classroom engages a broad range of students, addresses the Performance Expectations outlined in the Next Generation Science Standards, and supports the goals of the Common Core State Standards for English Language Arts. Even if you are science-shy, **Perfect Pairs** can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world.

**Sadie Walker Is Stranded** Madeleine Roux, 2012-01-31 Roux delivers the lurching laugh-filled sequel to Allison Hewitt's *Is Trapped*. Spring is in the air, and a radical group of Repopulationists is restless. Unfortunately, these zealots destroy a crucial barrier in north Seattle, unleashing the undead into the city. It's not good news for Sadie Walker, who's trying to live a normal life.

**Perfect Pairs** Melissa Stewart, Nancy Chesley, 2014 A teacher's guide to using fiction and nonfiction picture books to teach life sciences.

*The Passive Programming Playbook* Paula Willey, Andria L. Amaral, 2021-05-11 This book offers 101 passive programming ideas that are extendable, adaptable, customizable, and above all, stealable, so your passive programming never runs dry. Passive programming is a cheap, quick, fun way to make all library customers feel like part of the community. It can support reading initiatives, foster family engagement, encourage visit frequency, and coax interaction out of library lurkers while barely making a dent in your programming budget. Passive programming can be targeted at children, teens, adults, or seniors, used to augment existing programs, and executed in places where staff-led programming can't reach. It can be light-footed, spontaneous, and easily deployed to reflect and respond to current news, media, library events, and even the weather. But even passive programming pros run out of ideas sometimes, and when that happens, they want a fresh, funny source of inspiration.
