Philosophy in the New Century (Continuum Compact) Anthony O'Hear,2004-01-01 In this powerful re examination of the purpose and direction of philosophy for the next century Anthony O Hear engages with our most pressing questions Is there knowledge outside of science Does religion still have meaning and coherence today What is beauty and why do so few contemporary artists believe in it Contemporary philosophy mostly divides into the technical approach of the Anglo Americans which is inaccessible to most and the oracular obscurantism of the Continental approach which does violence to sense and reason O Hear argues that philosophy should work with the grain of tradition and commonsense to understand politics religion aesthetics and the vast number of ethical questions that will continue to arise as the scientific and technical revolution accelerates Giving up philosophy s special position means giving up our best chances of thinking and acting wisely In making a strong case for the relevance of philosophy Anthony O Hear presents a coherent and compelling vision for recovering wisdom in our time
