## **Pancreatic Cystic Neoplasms From Imaging To Differential Diagnosis And Management:**

*Pancreatic Cystic Neoplasms* George H. Sakorafas, Vassileios Smyrniotis, Michael G. Sarr, 2014-11-17 This book provides a thorough overview of the detection of PCNs using modern imaging techniques and a clear guide to the recognition of the different subtypes of PCN based on their radiologic and histopathologic features This volume will serve as an excellent aid to the selection of optimal therapeutic strategies based on preoperative diagnosis A further important feature is the emphasis placed on radiologic clinical and surgical correlations Pancreatic cystic neoplasms PCNs have been increasingly recognized during the past decade mainly because of the widespread use of modern imaging modalities for the investigation of often unrelated abdominal symptoms The three most common subtypes of PCN are serous cystic neoplasms mucinous cystic neoplasms and intraductal papillary mucinous neoplasms These subtypes have distinct radiologic and histopathological features and their biological behavior differs greatly Accurate preoperative diagnosis is of prime importance in selecting the optimal therapeutic strategy while serous cystic neoplasms are almost always benign and may be treated conservatively mucinous cystic neoplasms and intraductal papillary mucinous neoplasms have malignant potential warranting an aggressive surgical approach i e pancreatectomy Pancreatic Cystic Neoplasms will be of great interest to surgeons gastroenterologists radiologists oncologists and pathologists and also to internists and residents in these specialties

Biliary cancers are increasing in incidence with pancreatic cancer now accounting for the third most cancer deaths in the United States. Typically these malignancies as a group are managed by the same key providers comprising a multidisciplinary team. This book is intended to provide a comprehensive review of the current knowledge in the field of hepato pancreato biliary malignancies focusing on the practical and clinical care of patients. We take the approach of combining the collective expertise of an interventional gastroenterologist and a hepato pancreato biliary surgeon to provide the readers with accurate, succinct and pragmatic information needed to formulate the most appropriate treatment plan for their patients with the aim of the best possible outcome. Managing patients with these cancers continues to be challenging because of continued dismal survival rates. Each section in this text is written by experts in their respective field summarizing the most state of the art contemporary diagnostic and therapeutic tools available in the field. We believe this book will prove to be an invaluable comprehensive resource for all members of the multidisciplinary team caring for patients with hepato pancreato biliary malignancies.
