Cizek, 2019-05-14 The Handbook of Formative Assessment in the Disciplines meaningfully addresses current developments in the field, offering a unique and timely focus on domain dependency. Building from an updated definition of formative assessment, the book covers the integration of measurement principles into practice, the operationalization of formative assessment within specific domains, beyond generic strategies, evolving research directions, including student involvement and self-regulation, and new approaches to the challenges of incorporating formative assessment training into pre-service and in-service educator training. As supporters of large-scale testing programs increasingly consider the potential of formative assessments to improve teaching and learning, this handbook advances the subject through novel frameworks, intersections of theory, research, and practice, and attention to discernible disciplines. Written for instructors, graduate students, researchers, and policymakers, each chapter provides expert perspectives on the procedures and evaluations that enable teachers to adapt teaching and learning in process toward student achievement.

Federal Register, 2013-09 The Extinction of Experience Christine Rosen, 2024-09-10 An Esquire Best Book of 2024. A reflective original invitation to recover and cultivate the human experiences that have atrophied in our virtual world. We embraced the mediated life from Facetime and Venmo to meme culture and the Metaverse because these technologies offer novelty and convenience. But they also transform our sense of self and warp the boundaries between virtual and real. What are the costs? Who are we in a disembodied world? In *The Extinction of Experience*, Christine Rosen investigates the cultural and emotional shifts that accompany our embrace of technology. In warm philosophical prose, Rosen reveals key human experiences at risk of going extinct, including face-to-face communication, sense of place, authentic emotion, and even boredom. Considering cultural trends like TikTok challenges and mukbang, and politically unsettling phenomena like sociometric trackers and online conspiracy culture, Rosen exposes an unprecedented shift in the human condition, one that habituates us to alienation and control. To recover our humanity and come back to the real world, we must reclaim serendipity, community, patience, and risk.
