

Module 2.2 The browsing experience

Written module activity

1. Readability, navigation, consistency, layout and typography are all factors which influence the usability of web pages. Briefly describe each of these factors.
 - a) **Readability** – the quality of the experience the user has reading the web page, in other words, how easy to understand and attractive it is. This includes aspects such as the use of headings, short paragraphs and columns; the use of lists; grouping together of related ideas; attention to font types and size, background colour.
 - b) **Navigation** – the use of menu systems and hyperlinks to gain access to different subsections, get information or sources on a web page, or to move back or to the home page, is called 'navigation'. When a website is designed in such a way that users can move quickly, easily and intuitively to the parts that they need, we say that the website has 'good navigation'.
 - c) **Consistency** – the principle that determines that style, layout, typography, and design must be kept the same throughout a website.
 - d) **Layout** – how the various elements of a web page (text, graphics, buttons, etc.) are arranged on the web page. This includes aspects such as design for a target audience, as well as considering the resolution of the graphics and the time it would take to load the web page.
 - e) **Typography** – the placing and formatting of letters/text on paper/web page – the use of letter types and spacing to improve readability, as well as considering the commonly used font types.
 2. It is claimed that Google's success is due partly to the simple design of their home page. Look at the Google home page and write down three principles of good, simple usability that have been applied in the design of this web page.
 2. Aspects such as simplicity, minimalism, easy navigation, one single box for the typing in of search words/phrases, clearly visible, fast loading, focusing on the experience of the user, the general 'look-and-feel'.
 3. Suggest a reason why it is sometimes better to place information/text in columns rather than have it extend from left to right across the whole page?
 3. Columns lead to shorter lines that will be easier to read.
 4. Distinguish between spyware and adware.
 4. The term **spyware** refers to any technique or software that tries to monitor and track the way you use your computer, and then to report this information to a third party. **Adware** is 'free' software that is not really free – it is ad-sponsored. This means that the program keeps on popping up adverts.
