Institutional Challenges to Intermodal Transport and Logistics Jason Monios,2016-05-23 While the operational realities of intermodal transport are relatively well known the institutional challenges are less well understood This book provides an overview of intermodal transport and logistics including the policy background emerging industry trends and academic approaches Establishing the three key features of intermodal transport geography as intermodal terminals inland logistics and hinterland corridors Jason Monios takes an institutional approach to understanding the difficulties of successful intermodal transport and logistics Key areas of investigation include the policy and planning background the roles of public and private stakeholders and the identification of emerging strategy conflicts Substantial empirical content situates the theoretical and practical issues in real world examples via three detailed case study chapters covering the USA UK and Europe making the book useful to students as well as practitioners desiring an understanding of how intermodal transport and logistics work in practice The identified challenges to intermodal transport and logistics are used to demonstrate how

competing port and inland strategies can inhibit the necessary processes of integration required to underpin successful intermodal transport The book concludes with a look at the future of institutional adaptation that may enhance the capacity of freight actors to engage with intermodal transport developments The Plausible World B. Westphal,2016-04-30 In The Plausible World the intersections of literature and cartography enable readers to understand that place is anything but purely geographic a plausible world is created as a strategy to fill the void Innovative in his approach Westphal challenges the view that perceptions and representations of space are stable or straightforward Territorial Disputes in the South China Sea J. Huang,A. Billo,2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes Towards Good Order at Sea Thomas Mandrup,Francois Vre~,2015-03-01 The problems originating from the resultant bad order at sea can be directly felt on land when smuggling terrorism and related criminal activities operate more or less unhindered The book provides an important mapping of the challenges preventing good order at sea off the African coast and East Africa in particular Rear Admiral N Wang Commandant Royal Danish Defence College Land of the Fee Devin Fergus,2018-06-08 The loans ordinary Americans take out to purchase homes and attend college often leave them in a sea of debt As Devin Fergus explains in Land of the Fee a not insignificant portion of that debt comes in the form of predatory hidden fees attached to everyday transactions Beginning in the 1980s lobbyists for the financial industry helped dismantle consumer protections resulting in surreptitious fees often waived for those who can afford them but not for those who can't Bluntly put these hidden fees unfairly keep millions of Americans from their hard earned money Journalists and policymakers have identified the primary causes of increasing wealth inequality fewer good working class jobs a rise in finance driven speculative capitalism and a surge of tax policy decisions that benefit the ultra rich among others However they miss one commonplace but substantial contributor to the widening divide between the rich and the rest the explosion of fees on every transaction people make in their daily lives Land of the Fee traces the system of fees from its origins in the deregulatory wave of the late 1970s to the present The average consumer now pays a dizzying array of charges for mortgage contracts banking transactions auto insurance rates college payments and payday loans These fees are buried in the pages of small print agreements that few consumers read or understand Because these fees do not fall under usury laws they have redistributed wealth to large corporations and their largest shareholders By exposing this predatory and nearly invisible system of fees Land of the Fee reshapes our understanding of wealth inequality in America **21st Century Homestead: Sustainable Agriculture I** Marlon Henkel,2015-02-22 21st Century Homestead Sustainable Agriculture I contains the first part of everything you need to stay up to date on sustainable agriculture Suburban Urbanities Laura Vaughan,2015-11-12 Suburban space has traditionally been understood as a formless remnant of physical city expansion without a dynamic or

logic of its own Suburban Urbanities challenges this view by defining the suburb as a temporally evolving feature of urban growth Anchored in the architectural research discipline of space syntax this book offers a comprehensive understanding of urban change touching on the history of the suburb as well as its current development challenges with a particular focus on suburban centres Studies of the high street as a centre for social economic and cultural exchange provide evidence for its critical role in sustaining local centres over time Contributors from the architecture urban design geography history and anthropology disciplines examine cases spanning Europe and around the Mediterranean By linking large scale city mapping urban design scale expositions of high street activity and local scale ethnographies the book underscores the need to consider suburban space on its own terms as a specific and complex field of social practice

Intellectual Property and Free Trade Agreements in the Asia-Pacific Region

Christoph Antons, Reto M. Hilty, 2014-12-05 This book is highly topical The shift from the multilateral WTO negotiations to bilateral and regional Free Trade Agreements has been going on for some time but it is bound to accelerate after the WTO Doha round of negotiations is now widely regarded as a failure However there is a particular regional angle to this topic as well After concluding that further progress in the Doha round was unlikely Pacific Rim nations recently have progressed with the negotiations of a greatly expanded Trans Pacific Partnership Agreement that includes industrialised economies and developed countries such as the United States Japan Australia and New Zealand recently emerged economies such as Singapore but also several developing countries in Asia and Latin America such as Malaysia and Vietnam US and EU led efforts to conclude FTAs with Asia Pacific nations are also bound to accelerate again after a temporary slowdown in the negotiations following the change of government in the United States and the expiry of the US President's fast track negotiation authority The book will provide an assessment of these dynamics in the world's fastest growing region It will look at the IP chapters from a legal perspective but also put the developments into a socio economic and political context Many agreements in fact are concluded because of this context rather than for purely economic reasons or to achieve progress in fields like IP law The structure of the book follows an outline that groups countries into interest alliances according to their

respective IP priorities This ranges from the driving forces of the EU US and Japan via Asia Pacific resource rich but IP poor economies such as Australia and New Zealand recently emerged economies with strong IP systems such as Singapore and Korea to leading developing countries such as China and India and second tier industrializing economies such as Thailand Malaysia and Indonesia Deepening Neoliberalism, Austerity, and Crisis Julien Mercille, Enda Murphy, 2015-07-07 From bank bailouts to austerity Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors financiers bankers and the privileged are protected The authors expose the class based nature of Ireland's crisis resolution , Inside the Enemy's Computer Clement Guitton, 2017-08-01 Attribution tracing those responsible for a cyber attack is of primary importance when classifying it as a criminal act an act of war or an act of terrorism Three assumptions dominate current thinking attribution is a technical problem it is unsolvable and it is unique Approaching attribution as a problem forces us to consider it either as solved or unsolved Yet attribution is far more nuanced and is best approached as a process in constant flux driven by judicial and political pressures In the criminal context courts must assess the guilt of criminals mainly based on technical evidence In the national security context decision makers must analyse unreliable and mainly non technical information in order to identify an enemy of the state Attribution in both contexts is political in criminal cases laws reflect society's prevailing norms and powers in national security cases attribution reflects a state's will to maintain increase or assert its power However both processes differ on many levels The constraints which reflect common aspects of many other political issues constitute the structure of the book the need for judgement calls the role of private companies the standards of evidence the role of time and the plausible deniability of attacks
