Edexcel GCSE Geography B

Paper 1 - Global Geographical Issues - Hazardous Earth-Work Booklet

This is a very strong answer, containing several ideas. The cause of a tsunami is identified, along with the explanatory point of the energy causing waves. Further explanation is given regarding plate movement, a mark 3

Explain processes fully. Do not expect extensions to fill in the gaps for you

10. (1) Explain the cause of a tsunami.

A tsunami is caused by a release of energy caused by an earthquake which sends waves through the water. The earthquake is caused by a build up of pressure between two plates which then slip past each other, releasing energy.

With this type of question, as well as identifying the physical process causing a tsunami, some explanation is needed as to how this process leads to wave formation.

This is a typical response. A difference in between volcanic types is identified for a mark but there is no explanation as to why this difference occurs. 2 mark

Remember in 'explain and' questions, your first line needs to be identified and then developed with two explanatory points

11. (a) Explain the difference between the type of volcanoes found at divergent and convergent plate boundaries.

At divergent plate boundaries, the volcanoes are faster and not spread out. On the other hand, the volcanoes at convergent plate boundaries have been shaped like the ancient Mount Rainier.

Papers On Global Issues:

Global Issues Shirley A. Fedorak, 2013-11-29 Global Issues is a pedagogically rich text that offers a unique way of looking at contemporary issues such as food security and global conflict from a cross cultural and multidisciplinary perspective. By exploring each issue in depth, students gain an applied understanding of more abstract concepts like conflict, globalization, culture, imperialism, human rights, and gender, while the cross cultural approach encourages students to view the world from outside the Western box. Designed for introductory level students in global and international studies, human geography, anthropology, sociology, and development studies, this highly accessible text offers instructors and students a unique way of matching the concepts they learn in the classroom with important issues in the world in which they live and work.
