Knowledge Management for Competitive Advantage During Economic Crisis Ordoñez de Pablos, Patricia, Turró, Lluís Jovell, Tennyson, Robert D., Zhao, Jingyuan, 2014-09-30 Strategy management has always been a crucial business aspect that a company must understand to remain successful in the business world. However, there are a number of different approaches that a company can employ in order to differentiate themselves from the competition. Knowledge Management for Competitive Advantage During Economic Crisis brings together the various approaches that affect the superiority of a company's organizational performance and the gains they can make over their competitors. By focusing on concepts such as organizational learning and intellectual capital, this book is an indispensable reference source for researchers, practitioners, graduate students, and business managers interested in understanding what approaches are necessary to ensure superior organizational performance.

Quantitative Models for Value-Based Supply Chain Management Marcus Brandenburg, 2012-10-25 Supply chain management (SCM) strives for creating competitive advantage and value for customers by integrating business processes from end users through original suppliers. However, the question of how SCM influences the value of a firm is not fully answered. Various conceptual frameworks that explain the coherence of SCM and company value comprehended as value-based SCM are well accepted in scientific research, but quantitative approaches to value-based SCM are found rather seldom. The book contributes to this research gap by proposing quantitative models that allow for assessing influences of SCM on the value of a firm. Opposed to existing models that limit the observation to chosen facets of SCM or selected value drivers, this holistic approach is adequate to reflect configurational and operational aspects of SCM, cover all phases of the product life cycle, financially compare value impacts of profitability-related and asset-related value drivers, and assess influences of dynamics and uncertainties on company value.
