

Paragraphing

CSR focuses on environmental, philanthropic and ethical labour concerns, which in turn can generate a positive reputation leading to more sales and investment. According to Smith (2013), a corporation that invests profits into being environmentally friendly, helping local communities and providing a positive working environment, will demonstrate to the public and the media a conscientious company that focuses on more than just profit. This in turn will possibly improve consumer sales as customers will support ethical business practice, improving profitability and encouraging investment (Jones, 2014). For example, Yeo Valley have invested in community children projects and have also made all their products recyclable. As a result profits have doubled within the last two years making the company much more investable (Peterson, 2017). Overall, the evidence suggests that investing in CSR can improve brand image and productivity.
