New Grading For 2015wacce

Andre' Mathews

New Grading For 2015wacce:

The “New” Epidemic- Grading Practices Andre’ Mathews, 2016-03-16 This book is a comprehensive view on the grading practices and policies in American public schools. The content of the book identifies the lack of alignment amongst the Federal, State, and Local Districts and the need to adopt a unified policy. Educational institutions are creating their own versions of grading systems that lack integrity, flawed in design, hinder many students from graduating and/or achieving opportunities to become a more productive citizen after high school completion.

Section I The structure of the book begins with a systemic view of development by identifying the philosophical and theoretical aspects involved in the grading system.

Section II The authors work then transitions to the structure of the grading system addressing the mathematical aspects of calculating a student's grade point average to the teacher's validity of grades.

Section III This section identifies the parent's role and need to understand the grade itself and its effect on the student's overall outcome and class ranking.

Section IV The book ends with a strong analysis of the system, parental rights, examples of educational disasters, and schools' quest for new grading systems. All in all, this book takes a journey throughout the entire educational system, identifying a need for change on all levels as it relates to the grading system. The overall message emphasizes the parent's need to be cognizant of the importance of being involved and properly motivating, mentoring, monitoring, modeling, and managing their child's educational careers. All stakeholders should walk away with a sense of ownership to the problem and an understanding that the time for change is now. The ethnic margin is widening, and too many students are graduating unmarketable. A grade is more than a number; it's a quality of life.

Changing the Grade Jonathan Cornue, 2017-01-23 Many educators agree that the 100-point grading model is not always a reliable way to evaluate student learning. But is there another way to more accurately and equitably grade students and provide high-quality information to parents while fostering student learning? If so, why haven't school districts across the country changed their practices?

In *Changing the Grade*, author and educator Jonathan Cornue presents a detailed model for developing a more reliable standards-based grading system, including 30 steps to guide you through the process. In addition to identifying and addressing the barriers to change, such as concerns about how colleges and employers will interpret an alternative grading model, Cornue offers a concrete structure for changing the grading system, providing guidance on thinking in a new way about why grades are given and the purpose of a report card grade. Identifying what needs to be changed and what actions must be taken to facilitate the change. Building a team of stakeholders, including teachers, principals, and guidance counselors, to lead the change process. Developing the new standards-based grading structure. Designing standards-based assignments and assessments that align with a new grading structure. Avoiding grade inflation and getting buy-in from teachers and other staff members, principals, administrators, the board of education, and the community by demonstrating that the change process is intentional, research-based, student-focused, and permanent. The book also includes helpful samples of standards-based gradebooks, homework assignments,

rubrics and report cards If you are interested in making a systemic and systematic shift to a high quality grading structure that is far less subjective than many commonly found in schools consider Changing the Grade *The New Grading System* Alabama Polytechnic Institute.
