knowledge that students need to pass their exams and go on to provide expert clinical care It prepares nurses to assess patients understand underlying diseases and their signs and symptoms and go on to plan and deliver care The text encourages readers to develop their clinical reasoning and problem solving skills in order to apply theory to their work This edition has been produced by leading expert nursing academics and clinicians who bring a strengthened focus on inclusion and diversity Provides a person centred holistic approach to patient assessment and care Complex concepts are illustrated with figures tables summaries and reflections of best practice Case studies throughout based on real life medical surgical scenarios help students to apply theory to real life Clinical practice features offer practical guidance for students Underpinned by the nursing process framework Instructor resources on Evolve Image collection PowerPoint slides Student and Instructor resources on Evolve Answer guidelines for clinical reasoning questions in case studies Student case studies Fluids and electrolytes tutorial eNursing Care Plans Clinical Cases Case Study Review questions and answers with answer rationale Conceptual Care Map Create Refreshed and up to date evidence statistics standards and procedures Updated chapters on the deteriorating patient and advanced life support to reflect recent international ILCOR and national ARC practice guidelines New chapter on caring for individuals with intellectual disability and autism Increased focus throughout on culturally safe care that aims to improve access to services and improved health outcomes for M ori Aboriginal and Torres Strait Islander people Focus on the impact of COVID 19 Enhanced content on gender equity mental health intellectual disability and autism harm minimisation for people experiencing the effects of alcohol and other drugs patient safety and nurses wellbeing and safety at work Updated Evolve resources for students and instructors [National Institute for Health and Clinical Excellence](#) Great Britain: Parliament: House of Commons: Health Committee, 2013-01-16 The Health Committee is highly critical of the delay in setting out precisely what a value based pricing system for drugs entails There is also uncertainty about the implications of the changes proposed for the Cancer Drugs Fund which was introduced in 2011 to allow clinicians to use drugs that had not been approved by NICE and which will be superseded by the value based pricing system The Committee calls for an assessment of the outcomes for those patients whose treatment has been paid for by the Cancer Drugs Fund evidence of beneficial outcomes which should inform the new value based pricing scheme and applied to treatments of conditions other than cancer and clarity about how drugs which have been paid for by the Fund will continue to be available to individual patients There is also concern about the implications for the effectiveness of NICE of recent evidence about access to information from clinical drug trials There should be both a professional and legal obligation to ensure that all regulators including NICE have access to all available research data about the efficacy and safety of pharmaceutical products which are in use in the UK The pharmaceutical industry should introduce a new code of practice to make this commitment effective and the GMC should reiterate its guidance to doctors on the conduct of drug trials Is important for the credibility of NICE that Patient voice is effectively and openly represented in all its work and that NICE

guidance should continue to be guidance rather than an instruction and that the NHS should continue to allow local discretion but variations from NICE guidance should be open transparent and accountable [Public Health Reports](#) ,2001
