Senior,2015-07-10 There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working

collaboratively tend to achieve higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved However students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector [Global Action on School Library Guidelines](#)

Barbara A. Schultz-Jones, Dianne Oberg, 2015-06-16 This book celebrates the new IFLA School Library Guidelines and shows how the Guidelines can be used in improving school library services Each chapter describes innovative initiatives for developing implementing and promoting school library guidelines The book provides inspiration and guidance for the creation of national school library standards and for the development and use of standards and guidelines to change school library practice to define the teaching role of school librarians to guide the initial preparation of school librarians and to advocate for school library services Contributors to the book come from around the world Australia Canada Ethiopia France Malaysia Norway Poland Portugal Spain Sweden and the United States Their work illustrates the shared commitment of school librarians around the world to teaching and learning for all as envisioned in the IFLA UNESCO School Library Manifesto *Psychomotor Symptomatology in Psychiatric Illnesses* Manuel Morrens, Sebastian Walther, 2015-12-10

Psychomotor symptoms are those symptoms that are characterized by deficits in the initiation execution and monitoring of movements such as psychomotor slowing catatonia neurological soft signs NSS reduction in motor activity or extrapyramidal symptoms EPS These symptoms have not always received the attention they deserve although they can be observed in a wide range of psychiatric illnesses including mood disorders psychotic disorders anxiety disorders pervasive developmental disorders and personality disorders Nevertheless these symptoms seem to have prognostic value on clinical and functional outcome in several pathologies In the late 19th century the founding fathers of modern psychiatry including Kahlbaum Wernicke Kraepelin and Bleuler had a strong focus on psychomotor abnormalities in their description and definitions of psychiatric illnesses and systematically recognized these as core features of several psychiatric pathologies Nevertheless emphasis on these symptoms has reduced substantially since the emergence of psychopharmacology given the association between antipsychotics or antidepressants and medication induced motor deficits This has resulted in the general idea that most if not all psychomotor deficits were merely side effects of their treatment rather than intrinsic features of the illness Yet

the last two decades a renewed interest in these deficits can be observed and has yielded an exponential growth of research into these psychomotor symptoms in several psychiatric illnesses This recent evolution is also reflected in the increased appreciation of these symptoms in the DSM 5 As a result of this increased focus new insights into the clinical and demographical presentation the etiology the course the prognostic value as well as treatment aspects of psychomotor symptomatology in different illnesses has emerged Still many new questions arise from these findings This research topic is comprised of all types of contributions original research reviews and opinion piece with a focus on psychomotor symptomatology in a psychiatric illness especially research focusing on one or more of the following topics the clinical presentation of the psychomotor syndrome the course through the illness the diagnostical specificity of the syndrome the underlying neurobiological or neuropsychological processes new assessment techniques pharmacological or non pharmacological treatment strategies

Global Challenges, National Initiatives, and Institutional Responses Cláudia Sarrico, Pedro

Teixeira, António Magalhães, Amélia Veiga, Maria João Rosa, Teresa Carvalho, 2016-08-19 In this book we aim to discuss and reflect on how HEIs are coping with the demands placed on them and how the various dimensions of change are intertwined In particular we aim to discuss the following questions How do governance regimes steer higher education institutions This part of the book focuses its attention on how higher education and research institutions operate under different governance regimes at international regional and national levels and how that context shapes governance and management arrangements at institutional level How are institutions managing their quality and performance This part deals with the systems institutions are developing to manage their quality and their wider performance to cope with the internal and external forces pressing them to constantly improve their levels of quality and wider performance in teaching research and third mission How are higher education professionals responding to the transformations This part is devoted to investigate the ways academic and non academic professionals working in higher education and research institutions respond to the transformations occurring in their organisations and changes in practices and functions performed by those working in higher education It also explores the implication of higher education transformations on students

Metrics That Matter

Zachary Bleemer, Mukul Kumar, Aashish Mehta, Chris Muellerleile, Christopher Newfield, 2023-03-21 This book examines alternative perspectives on often flawed and misleading college metrics to help students make important education decisions

Reimagining Climate Change Paul Wapner, Hilal Elver, 2016-02-05 Responding to climate change has become an

industry Governments corporations activist groups and others now devote billions of dollars to mitigation and adaptation and their efforts represent one of the most significant policy measures ever dedicated to a global challenge Despite its laudatory intent the response industry or Climate Inc is failing Reimagining Climate Change questions established categories routines and practices that presently constitute accepted solutions to tackling climate change and offers alternative routes forward It does so by unleashing the political imagination The chapters grasp the larger arc of collective experience interpret its meaning for the choices we face and creatively visualize alternative trajectories that can help us cognitively and emotionally enter into alternative climate futures They probe the meaning and effectiveness of climate protection from below forms of community and practice that are emerging in various locales around the world and that hold promise for greater collective resonance They also question climate protection from above in the form of industrial and modernist orientations and examine large scale agribusinesses as well as criticize the concept of resilience as it is presently being promoted as a response to climate change This book will be of great interest to students and scholars of climate change global environmental politics and environmental studies in general as well as climate change activists

Frontiers in the Acquisition of Literacy Claire M. Fletcher-Flinn, 2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of

literacy including cross orthographic research **Reinventing America's Schools** David Osborne, 2017-09-05 From David Osborne the author of *Reinventing Government* a biting analysis of the failure of America's public schools and a comprehensive plan for revitalizing American education In *Reinventing America's Schools* David Osborne one of the world's foremost experts on public sector reform offers a comprehensive analysis of the charter school movements and presents a theory that will do for American schools what his New York Times bestseller *Reinventing Government* did for public governance in 1992 In 2005 when Hurricane Katrina devastated New Orleans the city got an unexpected opportunity to recreate their school system from scratch The state's Recovery School District RSD created to turn around failing schools gradually transformed all of its New Orleans schools into charter schools and the results are shaking the very foundations of American education Test scores school performance scores graduation and dropout rates ACT scores college going rates and independent studies all tell the same story the city's RSD schools have tripled their effectiveness in eight years Now other cities are following suit with state governments reinventing failing schools in Newark Camden Memphis Denver Indianapolis Cleveland and Oakland In this book Osborne uses compelling stories from cities like New Orleans and lays out the history and possible future of public education Ultimately he uses his extensive research to argue that in today's world we should treat every public school like a charter school and grant them autonomy accountability diversity of school designs and parental choice *Holocaust Education in Primary Schools in the Twenty-First Century* Claus-Christian W. Szejnmann, Paula Cowan, James Griffiths, 2018-07-09 This collection is the first of its kind bringing together Holocaust educational researchers as well as school and museum educators from across the globe to discuss the potentials of Holocaust education in relation to primary school children Its contributors are from countries that have a unique relationship with the Holocaust such as Germany Israel neutral Switzerland and Allied countries outside the UK Their research provides new insight into the diverse ways in which primary aged students engage with Holocaust education Chapters explore the impact of teaching the Holocaust to this age group school and museum teaching pedagogies and primary students perspectives of the Holocaust This book will appeal to school and museum educators of primary aged students whose work requires them to teach the Holocaust Citizenship or Civics or Human Rights Education Since the turn of the twenty first century there has been a transformation in school and museum based Holocaust education This book clearly demonstrates that primary education has been included in this transformation *Data and Research to Improve the U.S. Food Availability System and Estimates of Food Loss* National Research Council, Institute of Medicine, Food and Nutrition Board, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, 2015-01-02 The United States Department of Agriculture's USDA's Economic Research Service's ERS Food Availability Data System includes three distinct but related data series on food and nutrient availability for consumption The data serve as popular proxies for actual consumption at the national level for over 200 commodities e.g. fresh spinach beef and eggs The core Food Availability FA data series provides data on the amount of

food available per capita for human consumption in the United States with data back to 1909 for many commodities The Loss Adjusted Food Availability LAFA data series is derived from the FA data series by adjusting for food spoilage plate waste and other losses to more closely approximate actual intake The LAFA data provide daily estimates of the per capita availability amounts adjusted for loss e g in pounds ounces grams and gallons as appropriate calories and food pattern equivalents i e servings of the five major food groups fruit vegetables grains meat and dairy available for consumption plus the amounts of added sugars and sweeteners and added fats and oils available for consumption This fiscal year as part of its initiative to systematically review all of its major data series ERS decided to review the FADS data system One of the goals of this review is to advance the knowledge and understanding of the measurement and technical aspects of the data supporting FADS so the data can be maintained and improved Data and Research to Improve the U S Food Availability System and Estimates of Food Loss is the summary of a workshop convened by the Committee on National Statistics of the National Research Council and the Food and Nutrition Board of the Institute of Medicine to advance knowledge and understanding of the measurement and technical aspects of the data supporting the LAFA data series so that these data series and subsequent food availability and food loss estimates can be maintained and improved The workshop considered such issues as the effects of termination of selected Census Bureau and USDA data series on estimates for affected food groups and commodities the potential for using other data sources such as scanner data to improve estimates of food availability and possible ways to improve the data on food loss at the farm and retail levels and at restaurants This report considers knowledge gaps data sources that may be available or could be generated to fill gaps what can be learned from other countries and international organizations ways to ensure consistency of treatment of commodities across series and the most promising opportunities for new data for the various food availability series

Handbook of Academic Integrity Sarah Elaine Eaton, 2023-12-04 The book brings together diverse views from around the world and provides a comprehensive overview of academic integrity and how to create the ethical academy At the same time the Handbook does not shy away from some of the vigorous debates in the field such as the causes of academic integrity breaches There has been an explosion of interest in academic integrity in the last 20 30 years New technologies that have made it easier than ever for students to cut and paste coupled with global media scandals of high profile researchers behaving badly have resulted in the perception that plagiarism is on the rise This in combination with the massification and commercialisation of higher education has resulted in a burgeoning interest in the importance of academic integrity how to safeguard it and how to address breaches appropriately What may have seemed like a relatively easy topic to address students copying sources without attribution has in fact turned out to be a complex interdisciplinary field of research requiring contributions from linguists psychologists social scientists anthropologists teaching and learning specialists mathematicians accountants medical doctors lawyers and philosophers to name just a few Because of this broad interest and input this handbook serves as the single authoritative reference work which brings together the vast growing

interdisciplinary and at times contradictory body of literature For both established researchers practitioners and those new to the field this Handbook provides a one stop shop as well as a launching pad for new explorations and discussions **PISA**
A Review of International Large-Scale Assessments in Education Assessing Component Skills and Collecting Contextual Data Cresswell John, Schwantner Ursula, Waters Charlotte, 2015-12-11 The OECD has initiated PISA for Development PISA D in response to the rising need of developing countries to collect data about their education systems and the capacity of their student bodies
