Wiseman,2021-03-31 By drawing on quantitative data and

qualitative analyses of five major national education policies implemented in India over the last 15 years this comprehensive volume explores their impact on teacher quality and perceived effectiveness explaining how this relates to variations in student performance Responding to a national agenda to increase the quality of the Indian teacher workforce Teacher Quality and Education Policy in India critically questions the application of human capital theory to Indian education policy Chapters provide in depth and strategically structured analyses of five national policies including the recently approved National Education Policy NEP 2020 to see how Indian policymakers use teacher quality as a driver and measurement of education and national economic development Ultimately the text offers evidence based policy recommendations to improve teacher quality in India suggesting that while all five policies have contributed significant frameworks and recommendations for teacher quality reform they have failed to move beyond a symbolic function Given its rigorous methodological approach this book will be a valuable addition to the under researched question of education policymaking in postcolonial contexts It will be an indispensable resource not only for scholars working on policymaking in the Indian context but also for those working at the intersection of education teacher development and policymaking in developing countries

School based food and nutrition education SFNE helps schoolchildren and the school community to achieve lasting improvements in their food practices and outlooks build the capacity to change and to adapt to external change and pass on their learning to others SFNE has also an important role in complementing efforts that are being made globally to improve food environments and in empowering children and adolescents to become active participants in shaping the food system to

be better able to deliver healthy and sustainable diets Despite increasing interest for SFNE the evidence that supports it and its potential much of traditional SFNE particularly in LMICs is largely underfunded not delivering results and disconnected from other key interventions that aim to support the food nutrition environment and education nexus SFNE is under resourced with capacity development opportunities lacking throughout the school system This White Paper is the first document of its kind and it is based on the evidence professional expertise and field experience lessons learned and documented challenges of SFNE work in a variety of contexts It presents the case for raising the profile and transforming the vision and learning model of SFNE This document is directed firstly to a technical audience working in governmental organizations that deal with schoolchildren and adolescents and is also of interest to researchers technical advisors decision makers donors and investors civil society and UN organizations
