human rights through the investigation of the program and its outcomes The contributions to this volume examine the supranational and national inquiries into the US CIA led extraordinary rendition and secret detention programme in Europe The book takes as a starting point two recent and far reaching developments in delivering accountability and establishing the truth First the publication of the executive summary of the US Senate Intelligence Committee Feinstein Report and second various European Court of Human Rights judgments regarding the complicity of several state parties and the incompatibility of those actions with the European Convention of Human Rights and Fundamental Freedoms ECHR The collective volume provides the first stock taking review of the state of affairs in the quest for accountability and identifies significant obstacles in going even further as international law demands It will be vital reading for students and scholars in a wide range of areas including international relations international law public policy and counter terrorism studies **Development**

Cooperation of the 'New' EU Member States Ondřej Horký-Hlucháň, 2015-08-03 The book provides a comprehensive analysis of the international development policies of ten Central and Eastern European countries that joined the EU between 2004 and 2007 The contributors offer the first thorough overview of the new EU member states development cooperation programmes placing them in a larger political and societal context **Eisenhower at the Dawn of the Space Age** Mark Shanahan, 2016-11-14 Historians have established a norm whereby President Eisenhower's actions in relation to the dawn of the space age are judged solely as a response to the Soviet launch of the Sputnik satellite and are indicative of a passive negative presidency His low key actions are seen merely as a prelude to the US triumph in space which is largely bookended first by President Kennedy's man to the moon pledge in 1961 and finally by Neil Armstrong's moon landing eight years later This book presents an alternative view of the development of space policy during Eisenhower's administration assessing the hypothesis that his space policy was not a reaction to the heavily propagandized Soviet satellite launches or even the effect they caused in the US political and military elites but the continuation of a strategic journey This study engages with three distinct but converging strands of literature and proposes a revised interpretation of Eisenhower's actions in relation to rockets missiles and satellites namely that Eisenhower was operating on a parallel path to the established norm that started with the Bikini Atoll Castle H bomb tests developed through the CIA's reconnaissance efforts and was distilled in the Aeronautics and Space Act of 1958 which set a policy for US involvement in outer space that matched Eisenhower's desire for a balanced budget and fundamental belief in maintaining peace President Eisenhower was not interested in joining a space race while national security underpinned his thinking his space policy actions were strategic steps that actively sidestepped internecine armed forces rivalry and provided a logical next step for both civilian and military space programs at the completion of the International Geophysical Year In reassessing the United States first space policy the book adds to the revisionism under way in relation to the Eisenhower presidency focusing on the Helping Hands that enabled him to wage peace Oswaal UPSC CSE Prelims 10 Previous Years Solved Papers | General Studies | Paper I & II | Year-Wise 2015-2024

Promoting National Priorities in EU Foreign Policy Tomas Weiss,2017-01-06 How do smaller member states promote their interests in EU foreign policy and external relations EU membership can be seen to affect member states foreign policy in two ways either by restricting national policies or empowering states in a challenging global environment There is a general agreement however that the member states especially smaller ones have to engage actively in policy making in order to promote their particular interest This cross policy comparison of the behaviour of Czech Republic s representatives in the Council and the methods they use to influence the decision making applies categorisation from lobbying literature to analyse the behaviour of the member state s representatives and contributes to two strands of scholarship on European Union politics decision making in the EU and Europeanization The book maps the methods of interest promotion that can be used by a member state and analyses the differences in interest promotion across external policy areas

The Betrayal Kim Christian Priemel,2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany s divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler s rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials *The Betrayal* thus also explores how history underpins transitional trials as we encounter them in today s courtrooms from Arusha to The Hague

The Cambridge Handbook of Technical Standardization Law Jorge L. Contreras,2017-12-14 Technical standards are ubiquitous in the modern networked economy
