

35.1 Economic development

Economic development is an improvement in economic welfare.

Economic development is wider than economic growth
Besides improved living standards, it also involves:

- reducing poverty,
- increasing economic and social choices,
- increasing freedom &
- increasing self-esteem.

At first, the availability of basic life-sustaining products increases

Then, consumption increases beyond basic needs

& then, people have more choice of:
what to consume,
where to live &
where to work.

Different stages of economic development

Most economies are developing, but their rate and level of development varies.
Countries with high income per head also usually have relatively high economic development

United Nations divides countries into **four levels of development**

- **very high** human development
- **high** human development
- **medium** human development
- **low** human development

The World Bank divides countries into:

- **high** income
- **upper middle** income
- **lower middle** income
- **low** income

Measures of economic development

A common one is **real GDP per head**.

It measure material living standards (an important aspect of development)
But it does not measure all aspects of development.

A wider measure is the **Human Development Index (HDI)**

[explained in Chapter 32 \(Living Standards\)](#)

Bureau of Mines, 1931 **Economic Paper**, 1933 *US-China Relations in the Twenty-First Century* Michael Tai, 2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty first century In the West China's rise is often portrayed as a threat and China seen in negative terms This book explores the dynamics of this crucial relationship It looks in particular at what causes an international relationship to be perceived negatively and considers what can be done to reverse this arguing that trust is a key factor It goes on to discuss US and Chinese rhetoric and behaviour in three key areas climate change finance and international security The book contends that contrary to much US rhetoric China's actions in these areas is often much more flexible and accommodating than the US position and that the Chinese are much more knowledgeable about and understanding and appreciative of the United States than vice versa *China's Rise and Regional Integration in East Asia* Yong Wook Lee, Key-young Son, 2014-03-05 With featuring far reaching diversities and disparities among the regional states in their political economic and social systems and cultural and religious orientations East Asia is a microcosm of international society at large Nevertheless there are unique dynamics unfolding in East Asia at the turn of the twenty first century namely the rise of China as a contender for regional and global hegemony and a set of collective initiatives to integrate the region into a harmonious community This book provides new arguments on China's rise and the transformation of East Asia and analyzes the foreign policy behavior of the regional states and relations among them In doing so the contributors show why and how China is rising and how China's rise shapes the emerging regional structures and institutions in East Asia Furthermore given the East Asian context where the world's second and third largest economies coexist with much smaller states and with China's ascendancy likely to continue this book challenges the pervasive dichotomy of hegemony and community This allows for a fuller and more nuanced account of China's role and the shifting regional policies in East Asia in which hegemonic cooperation does not necessarily lead to a hegemonic form of regional order Presenting strategic political economic and historical perspectives on China's changing role in the region and the development of regionalism China's Rise and Regional Integration in East Asia will be of great interest to students and scholars of Chinese politics Asian politics international relations and regionalism *The China-Pakistan Economic Corridor of the Belt and Road Initiative* Siegfried O. inequality rising prices and stagnating incomes it stresses the role of economic and social factors as opposed to the domestic political and constitutional issues often assumed to be the root cause behind the protests It first argues that globalization and the increasing influence of China's economy in Hong Kong has weighted on salaries Second it shows that the oligopolistic nature of the local economy has generated rents which have reinforced inequality The book demonstrates that the younger generation which is still finding its place in society has been particularly affected by these phenomena especially with social mobility at a low point Offering a new approach to studying the Umbrella Movement this book will appeal to students and scholars interested in Hong Kong's political landscape as well Chinese politics more broadly The Evolution of Economic

The Imperial Presidency and the Constitution Gary Schmitt,Joseph M. Bessette,Andrew E. which situate migrants in a form of quasi political status as they move from one place to another It holds key benefits for exploring the philosophical and theological intersections of Dietrich Bonhoeffer Giorgio Agamben and Seyla Benhabib and those attempting to ask about treatment of the refugees and asylum seekers Prisoners of Hope will be of particular interest to those attempting scholarly research in the areas of theology religion and migration studies as it investigates the phenomenological experiences of refugees going in and out of detention as well as arguments relating to porous borders within sovereign national entities Initially the book engages definitions of migration moving onto concepts of State of Exception and Homo Sacer and analysing arguments regarding porous borders and cosmopolitanism Of specific benefit for Christian theology is the second half of the book which examines the importance of vicarious witnessing prayer voicing inclusion worshipping communities and the inclusion of the other Overall Prisoners of Hope is a pertinent addition to those discussing concepts of national sovereignty migrant assimilation asylum seeking hospitality and the juxtapositioning of the foreigner within the often intricate dialogues associated with political entry
