have asked for this type of treatment or deserved it Sometimes even the child who is bullied begins to internalize this idea For many years there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate But bullying is not developmentally appropriate it should not be considered a normal part of the typical social grouping that occurs throughout a child s life Although bullying behavior endures through generations the milieu is changing Historically bullying has occurred at school the physical setting in which most of childhood is centered and the primary source for peer group formation In recent years however the physical setting is not the only place bullying is occurring Technology allows for an entirely new type of digital electronic aggression cyberbullying which takes place through chat rooms instant messaging social media and other forms of digital electronic communication Composition of peer groups shifting demographics changing societal norms and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents educators and school administrators health care providers policy makers families and others concerned with the care of children this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences

Jimerson, Susan M.

Swearer, Dorothy L. Espelage, 2009-12-04 The Handbook of Bullying in Schools provides a comprehensive review and analysis of what is known about the worldwide bullying phenomena. It is the first volume to systematically review and integrate what is known about how cultural and regional issues affect bullying behaviour and its prevention. Key features include the following: Comprehensive: forty-one chapters bring together conceptual, methodological, and preventive findings from this loosely coupled field of study, thereby providing a long-needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner. International Focus: approximately forty percent of the chapters deal with bullying assessment, prevention, and intervention efforts outside the USA. Chapter Structure: to provide continuity, chapter authors follow a common chapter structure: overview, conceptual foundations, specific issues or programs, and a review of current research and future research needs. Implications for Practice: a critical component of each chapter is a summary table outlining practical applications of the foregoing research. Expertise: the editors and contributors include leading researchers, teachers, and authors in the bullying field, most of whom are deeply connected to organizations studying bullying around the world. **Kids and Violence** Catherine Dulmus, Karen Sowers, 2013-01-11 Implement prevention interventions and policies to curb the cycle of violence in our schools. Kids and Violence: The Invisible School Experience examines overt and covert violence occurring in the school setting involving students, school personnel, and school policy, and highlights a level of violence that is often hidden, ignored, or subtly tolerated. This book provides the latest research findings on various issues of violence in our schools. It also shows what happens when the adults responsible for the well-being of our children are actually perpetrating violence, staying silent about violence, or upholding a system that supports a violent atmosphere. Kids and Violence is unique in its holistic and systemic approach of examining types of violence that are often overlooked or endorsed by school policies. The book includes 11 chapters focusing on issues such as bullying, school personnel's role in violence, and prevention programs. The contributors are experts in their fields and include professors, deans, and directors of university social work schools. Kids and Violence presents the results of an exploratory study that examines self-identified bullies and addresses issues of immediate and vital importance, including bullying among students, grades 3-8 in a rural school district; observations by school personnel on bullying among elementary and middle school students; corporal punishment as a cultural norm in the United States and its impact on discipline in our schools; solution-focused crisis intervention with adolescents; bullying of children and other abuses of power by school personnel; adolescent dating violence in the school setting; and much more. It is time to stop the harmful cycle of violence in our schools. This valuable resource serves as a call
