

## Cyberbullying vs. Traditional Bullying

Many studies show that cyberbullying and traditional bullying are much different from each other. They also say that one is worse than the other, but just how different are they? Many teens think that what they are posting or texting is a joke, but think if you would be on the receiving end. If the social media "joking", continues it later becomes classified as cyberbullying. Cyberbullying and traditional bullying may have their differences, but they both are just as painful to others, but what one is said to be worse? Cyberbullying is said to be the most common type of bullying. The University of British Columbia survey states that 25-30 percent of young people have either participated in cyberbullying or received it ("Psychological, Physical, and Academic").

Only 12 percent have said the same about traditional bullying. Since cyberbullying is more common, it's worse and creates even more problems. To top off of these issues, 95 percent of young people said what was online was meant to be a joke. Only 5 percent truly meant what they said. So what really makes cyberbullying and traditional bullying different? Traditional bullying deals with a victim or bystander, whereas cyberbullying is only online. Traditional bullying is also said to be planned out and is pre-meditated upon. Cyberbullying happens by the circumstance and doesn't wait to plan the next attack. Traditional bullying deals with a need for power and control. The bully needs to feel power while in his actions. Also, the bully strategically plans out their next victim and attack them. They show a lot of aggression, as part of their way to control the situation ("Cyberbullying and Traditional Bullying: Differences"). Now you might be asking, what is cyberbullying? By definition, it is said to be the deliberate and repeated harm inflicted through the use of phones, computers, and other electronic devices ("What is Cyberbullying?"). This is an easier way of bullying because it keeps from face-to-face interaction. Many teens become disoriented while looking at a screen and say things they would never say in public. In addition to this, without being able to see their reactions to the comments, the commenter doesn't realize if they've gone too far. In today's society, comments might be meant as a joke but the question is, "who's laughing?" Teens don't realize if they've gone too far, and they need to realize the harm they can inflict on others.

Just imagine that someone gets a text from a friend to check out an instagram page, this person goes there to see degrading posts and a crude picture of herself in a swimsuit that had been photoshopped. Following the posts are a string of rude comments. She starts getting text after text from people, some she doesn't even know, saying mean things about the post. It feels as though the world is laughing at her, but only she isn't. She dreads going to school the next day because she has to face the
