Unit 1
ACADEMIC STUDY OF RELIGION

1. Religion, a Global Human Activity

Right from the dawn of human consciousness, religion has asked the deepest questions humans can think about. Through the ages, it has been shaping politics, law, history, economics, science and arts. It has taken a central place in the lives of all civilizations and cultures.

While modern insights from a wide range of scientific disciplines have changed our view of the world, religion persists in variety and is often on the rise. We find it everywhere: on television and in film, music, art, literature and architecture. Our calendars are dotted with religious festivals. We encounter religion at the centre of global issues, cultural and political conflicts. We see it in the lives of the people we know and love, and in ourselves, as we live out and grapple with our own religious faith.

Scholars of religious studies do acknowledge that the struggle for religious freedom and beliefs had a complex and controversial history for centuries. It had often led to tragic conflicts and bloodshed in many parts of the world. At the same time, they also remind us that religion accounts for profound thoughts and intense spiritual experiences humanity ever had. It inspires believers to incredible commitment to human welfare – to forthright altruistic action even at the cost of one's own life. The American Academy of Religion (AAR), world's largest association of renowned scholars from all over the world in the field of religious studies, comments: "For both practitioners and observers – for everyone who wants to be informed about the world around them – religion is an intensely curious phenomenon that calls out for better understanding."¹

1.1. Academic study of religion

The academic study of religion – also known as religious studies – teaches the history, scripture, creed, code, cult, and community organization of faith communities as well as their reinterpretations over time. It is founded on the premise that religion, each in its own unique way, has always had a deep influence to the growth of civilizations and cultures. Hence all religions are treated with equal respect, and they are approached collectively as a rich subject for academic study.

The origin of the academic study of religion as we have today in many universities across the world began with the 19th century encounters that took place between renowned western and eastern scholars of religion. They were instrumental to introduce religion as part of liberal arts in centres of higher education. Their aim was to preserve and promote the rich spiritual, moral and cultural values found in the religious traditions for human advancement.
