been more than a decade since the beginning of the global financial crisis yet it continues to cast a shadow not least in the policy choices of many advanced economies The COVID 19 pandemic and the shock of lockdowns left behind an aftermath of a surge in public debt levels and a reversal of global development progress Geopolitical tensions and conflicts have further reshaped an increasingly multipolar international order with far reaching implications for technology growth and development Overshadowing these developments is the growing awareness that the world s rising temperature poses grave dangers to the long term prospects for humanity with the world currently on track for a temperature rise significantly above the targets set out in the Paris Agreement in 2015 The critical question for this pivotal moment is not whether the world still needs economic growth but how that growth is achieved and whether it is aligned with other important national and global priorities Against this backdrop universities are essential in educating and providing professional human resources and conducting high quality research that benefits humanity However universities must play a significant role and be innovative and creative in engaging and supporting the development opportunities and consolidation of the global community To embark on this role effectively universities must always foster communication and discussion among stakeholders under the Sustainability Development Goals SDGs Academia Government Business and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues Sustainable Collaboration in Business Information and Innovation SCBTII 2024 is an international conference that brings together academics professionals entrepreneurs researchers learners and other associated groups from all over the world that are interested in theories as well as practices in the field of the digital economy for global competitiveness This conference provides opportunities for presenters and participants to exchange new ideas and experiences create research relationships and find international partners for future collaboration to respond to economic business social and technological development challenges successfully and effectively for better life and well being

Structures of Grace John Gallagher, Jeanne Buckeye, 2014-12-01 This is a book about the business practices of a group of companies who are dedicated to changing the world These companies participate in the Economy of Communion EOC project which is an initiative of the international and ecumenical Focolare movement For these companies changing the world means humanizing the economy by consistently privileging relationships over profit maximizing and by putting profits in common and using them to address acute social needs and concerns It also means humanizing companies and organizations through business practices that respect the inherent dignity of each person and that are aimed at breaking down barriers between people in business The book is the product of a rigorous robust and multi year research project involving more than a dozen U S and Canadian based EOC companies and should be considered a case study of the EOC rather than a study of any of the individual companies What indeed do we mean by structures of grace First and foremost the title reflects our conviction that EOC companies are indeed different And that difference is centered on a conviction of the business as a set of relationships or more accurately a

community and the conviction that the purpose of economic activity the production and distribution of goods and services is to bring people together to create community For us this is the defining characteristic of the EOC
