**Proceedings of the International Conference on Sustainable Collaboration in Business, Technology, Information, and Innovation (SCBTII 2024)** Suhail Kusairi, Forget Mingiri Kapingura, Putri Fariska Sugestie, Nizam Ahmat, 2024-11-16 This is an open access book Global growth has lost momentum On average GDP growth has declined from more than 2% in advanced economies and nearly 6% in emerging and developing economies in the early 2000s to less than 1.5% and less than 2% post COVID period A succession of crises has compounded this sustained slowdown in growth It has been more than a decade since the beginning of the global financial crisis yet it continues to cast a shadow not least in the policy choices of many advanced economies The COVID 19 pandemic and the shock of lockdowns left behind

an aftermath of a surge in public debt levels and a reversal of global development progress Geopolitical tensions and conflicts have further reshaped an increasingly multipolar international order with far reaching implications for technology growth and development Overshadowing these developments is the growing awareness that the world's rising temperature poses grave dangers to the long term prospects for humanity with the world currently on track for a temperature rise significantly above the targets set out in the Paris Agreement in 2015 The critical question for this pivotal moment is not whether the world still needs economic growth but how that growth is achieved and whether it is aligned with other important national and global priorities Against this backdrop universities are essential in educating and providing professional human resources and conducting high quality research that benefits humanity However universities must play a significant role and be innovative and creative in engaging and supporting the development opportunities and consolidation of the global community To embark on this role effectively universities must always foster communication and discussion among stakeholders under the Sustainability Development Goals SDGs Academia Government Business and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues Sustainable Collaboration in Business Information and Innovation SCBTII 2024 is an international conference that brings together academics professionals entrepreneurs researchers learners and other associated groups from all over the world that are interested in theories as well as practices in the field of the digital economy for global competitiveness This conference provides opportunities for presenters and participants to exchange new ideas and experiences create research relationships and find international partners for future collaboration to respond to economic business social and technological development challenges successfully and effectively for better life and well being

Ungson, Yim-Yu Wong, 2014-12-18 International business is undergoing continuous transformation as multinational firms and comparative management evolve in the changing global economy To succeed in this challenging environment firms need a well developed capability for sound strategic decisions This comprehensive work provides an applied and integrated strategic framework for developing capabilities that lead to global success It is designed to help readers achieve three essential objectives First it provides intellectual and practical guidelines for readers to execute goals and strategies that lead to meaningful and productive results The book is packed with frameworks cases anchoring exercises techniques and tools to help readers emerge with a completed business plan after the last chapter Second it focuses on strategy and how firms build competitive presence and advantages in a global context A primary learning objective is to enable readers to understand and evaluate the major issues in strategy formulation and implementation in a global context Third it provides an accessible framework that will help guide readers in making strategic decisions that are sound and effective It offers a unifying process that delineates the necessary steps in analyzing the readiness of a firm to do business abroad In addition to core issues each chapter presents frameworks analytical tools action oriented items and a real world case all designed to provide insights on the challenges imposed by globalization and technology on managers operating in a global context **Principles of Operations Management** Jay H. Heizer, Barry Render, 2004 In this textbook Heizer business administration Texas Lutheran U and Render operations management Rollins College provide a broad introduction to the field of operations management A sampling of topics includes operations strategy for competitive advantage forecasting design of goods and services human resources e commerce project management inventory management and maintenance The CD ROM contains video case studies lecture notes Excel OM and Extend software and additional practice problems Annotation copyrighted by Book News Inc Portland OR *The Lean, Smart, Digital Supply Chain* Paul Myerson, 2025-05-15 Technology plays a key role in enabling lean and agile supply chain operations For example connecting to suppliers in real time facilitates re supplying parts and materials for a just in time production environment But choosing the wrong technology can create waste in terms of the time effort and money spent evaluating selecting implementing and using it Furthermore lean has been traditionally thought of as a pen and pencil technique as they were mostly confined to a single facility As a consequence while there are many books written on lean manufacturing lean office and to a lesser degree lean global supply chain most if not all barely discuss the role and

impact of technology in process improvement and there aren't many books that combine the topics of a lean and agile supply chain and technology smart and otherwise in this way This book makes the case that technology is a key enabler of a lean supply chain and is unique in that it links lean and agile thinking with available and affordable technologies to get the most out of improved processes Essentially this book details various supply chain and logistics management areas where lean and agile thinking in combination with existing and emerging technologies such as the Internet e commerce Enterprise Resource Planning ERP systems Robotics IoT AI and Data Analytics can take an organization to the next level through increased speed accuracy integration and collaboration among all parties in the supply chain     The 30 Day MBA Colin Barrow,2016-01-03 Drawing on the twelve core disciplines of business including business law economics marketing and finance this fourth edition of the hugely successful The 30 Day MBA shows you how to use key business concepts and tools to assess business decisions and implement strategy Now with a new concept for each chapter including crowdfunding digital marketing business incubators and the 80 20 principle The 30 Day MBA also provides coverage of the key optional modules Mergers and Acquisitions and International Business New case studies include Chilango TomTom Heinz Hotel Chocolat Shell The Card Factory and Adidas among others Including a range of free online questions and answers that enable you to self assess your knowledge this bestselling classroom free guide is brimming with models international case studies and practical applications of key theories placing MBA skills within reach of all professionals and students     **Management Concepts And Strategies** J S Chandan,1997 Simple clear unambiguous well structured well grounded and authoritative this book covers the tools techniques and strategies used by effective managers     (CIMs)     09-01-2021,     .
