

R. Buckminster Fuller

"A comprehensive, all-purpose, long-distance, world-around genius-talker who teaches everything to everyone everywhere. ... In one great leap he has crossed the generation gap and has taken the young with him on a trip through the universe." *****

Operating Manual for Spaceship Earth

is a brilliant synthesis of the Fuller system. In this essay, Mr. Fuller traces man's intellectual evolution and copes with some of the great problems we face today. How is man to survive? How does automation affect the individual? Where are we to find resources to feed the poor? Fuller sees this planet as a complete environment system. He challenges the concepts of specialization, makes a myth of the population explosion theory, calls for increased industrialization and systematic use of the computer. *****

Operating Manual for Spaceship Earth

charts a new course for man—one in which the quality of life is a prime and realizable goal. *****
