Operation Maintenance Manual Hvac System:

Maintenance Manual, Heating, Ventilating, & Air Conditioning (HVAC) System for Emergency Operations Center, 1986
HVAC Commissioning Guidebook Maija Virta, 2021-03-31 Green buildings have become common in India and other countries in Asia. However, there is a concern regarding the performance of green buildings failing to meet the expectations of clients during the operation. One of the key reasons for this is poorly commissioned HVAC systems. In this publication, we provide tools and knowhow for more efficient HVAC commissioning. It gives answers for four major questions: why commissioning is needed, how to perform proper commissioning, which key performance issues of common HVAC equipment need to be considered, and what kind of checklists are used during commissioning. It covers the entire commissioning process, beginning with the owner's project requirements and commissioning design reviews. Then it explains procedures during installation and start-up of equipment, followed by functional performance testing, seasonal commissioning, and 10 months operation review. This publication is developed by Indian Society of Heating, Refrigeration and Air Conditioning Engineers (ISHRAE) for Indian and Asian requirements in conjunction with the Federation of European HVAC Associations (REHVA). The process steps described in this publication are in line with all major international building standards and green building certification schemes. Note: T F does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh, and Sri Lanka.
