

GENERAL

The MP5-N Submachine Gun, for 9 mm x 19 (Luger) ammunition, is an automatic weapon produced in accordance with the most advanced manufacturing methods. It permits either single shots or bursts to be fired from all positions.

The submachine gun is recoil-operated, with stationary barrel and delayed roller locked bolt system.

Its high accuracy in the single fire mode results from the fact that the submachine gun fires from closed bolt position, in conjunction with the recoil-operated delayed roller locked bolt system.

This delayed roller locked bolt system also allows the weapon to be held more easily when firing bursts.

The MP5-N offers absolute safety because it fires from the closed bolt position.

The ammunition is fed from a 15- or 30-round magazine.

The weapon has facilities for firing with a silencer.
