Naming Standards and Definitions

In general, make names meaningful and brief. Do not use generic, all-purpose phrases like "COMMON", "MISC", "OTHER", or "UTILITY" in the name.

Database Objects

In addition to specific naming conventions for particular objects, all database objects should be named without using any special characters. Database object names should use only ASCII letters, numbers, and underscores, and they should always begin with a letter. Note that database object names are case-insensitive, so "Name" would be the same as "NAME".

Include header information when you create your objects. The header should include the following documentation

- Name
- Purpose
