Though many works have attempted to solve the dilemma, none have tried to identify the underlying causes of the backlash against the policy. In order to understand affirmative action's future, one must understand its evolution, its opposition, and its application both in America and in other nations. In a multi-disciplinary approach, this book examines affirmative action from comparative historical policy and sociological perspectives. Also included is a list of Supreme Court rulings on affirmative action.

Fight the Tower Kieu Linh Caroline Valverde, Wei Ming Dariotis, 2020 Asian American women scholars experience shockingly low rates of tenure and promotion because of the ways they are marginalized by intersectionalities of race and gender in academia. *Fight the Tower* shows that Asian American women stand up for their rights and work for positive change for all within academic institutions. The essays provide powerful portraits, reflections, and analyses of a population often rendered invisible by the lies sustaining intersectional injustices to operate an oppressive system.

Higher Education for All Andrew Stone Higgins, 2023-03-16 The 1960 California Master Plan for Higher Education remains to this day the largest and most ambitious attempt to provide free universal college education in the United States. Yet the Master Plan, the product of committed Cold War liberals, unfortunately served to reinforce the very class-based exclusions and de facto racism that plagued K-12 education in the nation's largest and most diverse state. In doing so, it inspired a wave of student and faculty organizing that not only forced administrators and politicians to live up to the original promise of the Master Plan: quality higher education for all, but changed the face of California itself. *Higher Education for All* is the first and only comprehensive account of the California Master Plan. Through deep archival work and sharp attention to a fascinating cast of historical characters, Andrew Stone Higgins has excavated the forgotten history of the Master Plan from its origins in the 1957 Sputnik Crisis through Governor Ronald Reagan's financial starvation and his failed quest to introduce tuition to the student struggle to institute affirmative action in university admissions.

Mexicano Political Experience in Occupied Aztlan Armando Navarro, 2005-07-14 This exciting new volume from Armando Navarro offers the most current and comprehensive political history of the Mexicano experience in the United States. He examines in depth topics such as American political culture, electoral politics, demography, and organizational development. Viewing Mexicanos today as an occupied and colonized people, he calls for the formation of a new movement to reinvigorate the struggle for resistance and change among Mexicanos. Navarro envisions a new political and cultural landscape as the dominant Latino population re-Mexicanizes the U.S. into a more multicultural and multiethnic society. This book will be a valuable resource for political and social activists and a teaching tool for political theory, Latino politics, ethnic and minority politics, race relations in the United States, and social movements.

In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy: 1. Increase America's talent pool by vastly improving K-12 mathematics and science education; 2. Sustain and strengthen the nation's commitment to long-term basic research; 3. Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and 4. Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. *Rising Above the Gathering Storm* will be of great interest to federal and state government agencies, educators, and schools, public decision makers, research sponsors, regulatory analysts, and scholars. *The Insider's Guide to the Colleges, 2011*, Staff of the Yale Daily News, 2010-06-15.
