

## UC Personal Statement

There are thousands of reasons to want to attend the University of California. Not only is the weather virtually always nice, California is also home to some of the largest companies in technology and the biomedical sciences. I was attracted to the University due to all these reasons and more, but the most important distinction about the school was its diverse interdisciplinary program. As an individual that seeks to combine knowledge in multiple fields towards a single degree, it is very important for me to attend an institution with a track record of support and excellence in supporting students seeking a cross-study experience. I strongly believe that the interdisciplinary academic program at the University of California will prepare me for a successful career in Bioinformatics Engineering.

Bioinformatics Engineering is a relatively new field in which most schools do not even offer any courses. The field piqued my interest when I took a bioinformatics course over the summer at my local community college, during which it was mentioned that the algorithms developed for biological purposes often do not match the capabilities of the techniques and machines used to gather raw data. After speaking further with the professor, I learned that there was an entire field dedicated to providing a solution to this problem – bioinformatics engineering.

As a very new and cross-disciplinary field, extensive knowledge from several different areas of study is required. The University of California has nationally-acclaimed programs in bioinformatics, biology, engineering, and computer science. I hope to work with award-winning faculty to combine courses in all these areas to create a challenging curriculum which will prepare me for a career in industry. The industry connections that I will forge through applied learning experiences will also be crucial to me in obtaining a position in a leading bioinformatics company. The strong interdisciplinary program at the University of California is exactly the type of integrated and industry-savvy experience I am seeking to propel myself forward into the exciting field of Bioinformatics Engineering.

**Doing Our Own Thing** John McWhorter,2004-09-09 McWhorter is a gifted young linguist who seeks to understand the change in our verbal habits rather than just bemoan it and his analysis is insightful richly documented and yes eloquently written Steven Pinker author of *The Blank Slate* and *The Language Instinct* In *Doing Our Own Thing* critically acclaimed linguist and cultural critic John McWhorter traces the precipitous decline of language in contemporary America arguing persuasively that casual everyday speech has conquered the formal in all arenas from oratory to poetry to everyday journalism and has even had dire consequences for our musical culture McWhorter argues that the

swift and startling change in written and oral communication emanated from the countercultural revolution of the 1960s and its ideology that established forms and formality were autocratic and artificial While acknowledging that the evolution of language is in and of itself inevitable and often benign he warns that the near total loss of formal expression in America is unprecedented in modern history and has reached a crisis point in our culture such that our very ability to convey ideas and arguments effectively is gravely threatened By turns compelling and harrowing passionate and judicious *Doing Our Own Thing* is required reading for all concerned about the state of our language and the future of intellectual life in America
