Doing Business and Investing in the United Kingdom, 1999 **Teaching IFRS** Richard M.S. Wilson, Ralph Adler, 2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards IFRS highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS Teaching IFRS offers expert descriptions of and insights into the IFRS convergence process from a teaching and learning perspective Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption Drawing upon the experiences of those who have sought to introduce IFRS related classroom innovations and the associated student outcomes achieved therefrom the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS related teaching resources to support those courses This book was originally published as a special issue of Accounting Education An international journal **Tiley's Revenue Law** Glen Loutzenhiser, 2019-08-22 This is the ninth edition of John Tiley's major text on revenue law covering the UK tax system income tax capital gains tax and inheritance tax as well as incorporating sections dealing with corporation tax international and European tax savings and charities This new edition is fully revised and updated with the latest case law statutory and other developments including Finance Act 2019 The book is designed for law students taking the subject in the final year of their law degree or for more advanced courses and is intended to be of interest to all who enjoy tax law Its purpose is not only to provide an account of the rules but also to include citation of the relevant literature from legal periodicals and some discussion of or reference to the background material in terms of policy history or other countries tax systems Copy the URL below to read a 2021 supplement highlighting new developments since the book's publication in 2019 <https://www.bloomsbury.com/media/2v1ej5vw/tileys-revenue-law-supplement-2021.pdf> **A History of Corporate Financial Reporting in Britain** John Richard Edwards, 2018-07-11 A History of Corporate Financial Reporting provides an understanding of the procedures and practices which constitute corporate financial reporting in Britain at different points of time and how and why those practices changed and became what they are now Its particular focus is the external financial reporting practices of joint stock companies This is worth knowing about given the widely held view that Britain i pioneered modern financial reporting and ii played a primary role in the development of both capital markets and professional accountancy The book makes use of a principal and agent framework to study accounting's past but one where the failure of managers always to supply the information that users desire is given full recognition It is shown that corporate financial reporting did not develop into its current state in a straightforward and orderly fashion Each era produces different environmental conditions and imposes new demands on accounting A proper understanding of accounting developments therefore requires a careful examination of

the interrelationship between accountants and accounting techniques on the one hand and on the other the social and economic context within which changes took place The book's corporate coverage starts with the legendary East India Company created in 1600 and continues through the heyday of the statutory trading companies founded to build Britain's canals commencing in the 1770s and railways commencing c 1829 to focus principally on the limited liability company fashioned by the Joint Stock Companies Act 1844 and the Limited Liability Act 1855 The story terminates in 2005 when listed companies were required to prepare their consolidated accounts in accordance with International Financial Reporting Standards thus signalling the effective end of British accounting
