Uk Year 7 Cat Tests:

Analysing Underachievement in Schools Emma Smith, 2005-06-09 Underachievement in school is one of the most widely used terms in education today. As a discourse it has been responsible for influencing government policy, staffroom discussions as well as the pages of academic journals and the TES. It is also a subject which raises questions about what we expect from a fair and equitable education system. This book provides a critical analysis of two sides of the underachievement debate at each of the three levels of focus: international, the UK and the individual. On the one hand it will consider the crisis account of falling standards and failing pupils and on the other present an alternative account which urges a re-evaluation of the underachievement debate in order to consider who might be underachieving and why.
