Monetary Policy in Sub-Saharan Africa Andrew Berg, Rafael Portillo, 2018-02-23 Low income countries in sub Saharan Africa present unique monetary policy challenges from the high share of volatile food in consumption to underdeveloped financial markets however most academic and policy work on monetary policy is aimed at much richer countries Can economic models and methods invented for rich countries even be adapted and applied here How does and should monetary policy work in sub Saharan Africa Monetary Policy in Sub Saharan Africa answers these questions and provides practical tools and policy guidance to respond to the complex challenges of this region Most countries in sub Saharan Africa have made great progress in stabilizing inflation over the past two decades As they have achieved a degree of basic macroeconomic stability policymakers are looking to avoid policy misalignments and respond appropriately to shocks in order to achieve stability and growth Officially they often have adopted money targeting frameworks a regime that has long disappeared from almost all advanced and even emerging market discussions In practice though they are in many cases finding current regimes lacking with opaque and sometimes inconsistent objectives inadequate transmission of policy to the economy and difficulties in responding to supply shocks Monetary Policy in Sub Saharan Africa takes a new approach by applying dynamic general equilibrium models suitably adapted to reflect key features of low income countries for the analysis of monetary policy in sub Saharan African countries Using a progressive approach derived from the International Monetary Fund s extensive practice and research Monetary Policy in Sub Saharan Africa seeks to address what we know about the empirics of monetary transmission in low income countries how monetary policy can work in countries characterized by underdeveloped financial markets and opaque policy regimes and how we can use empirical and theoretical methods largely derived in advanced countries to answer these questions It then uses these key topics to guide policymakers as they attempt to adjust food price terms of trade aid shocks and the effects of the global financial crisis Varieties of Opposition to Gender Equality in Europe Mieke Verloo, 2018-03-09 In contrast to the wealth of studies on progress towards gender equality opposition to gender equality is rarely studied which makes it difficult to understand the positive and negative dynamics of gender equality as a political project The first of its kind this timely collection examines the potential and challenges of our current scholarship on understanding opposition to gender equality in Europe Divided into three parts Mieke Verloo and her team of international experts begin Varieties of Opposition to Gender Equality in Europe by theorizing the dynamics of opposition to gender equality policies in Europe Part Two highlights oppositional actors politicians governments citizens policy makers churches and political arenas parliament courts Internet as well as different and opposing visions of gender equality Part Three concludes with a framework for understanding oppositional dynamics on gender equality change Setting the agenda for future research this book will be useful for students of gender and politics social movements European integration and policy studies as well as for high level policymakers students and feminist activists alike It will be an

 Young in Super-Aging Japan* Patrick Heinrich, Christian Galan, 2018-05-15 Japan is not only the oldest society in the world  
 today but also the oldest society to have ever existed This aging trend however presents many challenges to contemporary  
 Japan as it permeates all areas of life from the economy and welfare to social cohesion and population decline Nobody is  
 more affected by these changes than the young generation This book studies Japanese youth in the aging society in detail It  
 analyses formative events and cultural reactions Themes include employment parenthood sexuality but also art literature and  
 language thus demonstrating how the younger generation can provide insights into the future of Japanese society more  
 generally This book argues that the prolonged crisis resulted in a commonly shared destabilization of thoughts and attitudes  
 and that this has shaped a new generation that is unlike any other in post war Japan Presenting an inter disciplinary  
 approach to the study of the aging trend and what it implies for young Japanese this book will be useful to students and  
 scholars of Japanese culture and society as well cultural anthropology and demography      The French Centre Right and the  
 Challenges of a Party System in Transition William Rispin, 2020-11-30 This book argues that the defeat of the main French  
 Centre Right party in the 2017 presidential and legislative elections and its subsequent disintegration were the result of a  
 failure to respond effectively to the challenges posed by a continuing realignment of the party system By the start of the  
 Hollande presidency many sections of the electorate had lost faith in the traditional parties of government and the ideologies  
 which they represented and were adopting a more individualist approach to politics The Left Right divide which had  
 determined relations between parties since the creation of the Fifth Republic in 1958 gave way to a new arrangement based  
 on three axes identity liberal economics and Europe These policy areas would provoke major differences of opinion among  
 supporters of the Centre Right and lead a significant number of them to abandon Les R publicains which was a major factor
