Minutes of Proceedings and Evidence of the Standing Committee on External Affairs and National Defence Canada. Parliament. House of Commons. Standing Committee on External Affairs and National Defence, 1984 *Orbital Debris Prevention and Mitigation Efforts among Major Space Actors* Marc Carns, 2023-07-03 In the absence of formal treaty law orbital debris has grown exponentially in our most valuable orbital regions To address this problem many major spacefaring programs have implemented independent laws and policies meant to mitigate the release and overall threat of debris However these individual efforts have not translated into a cohesive international set of regulations to address the growing debris problem Fortunately there may exist unappreciated similarities among major international programs either in whole or part that once identified could lay the groundwork for the recognition of customary international law This book reviews a number of major programs in depth and seeks to answer if any commonality among them has likely established customary international law Japan and the IISS Robert Ward, Yuka Koshino, Matthieu Lebreton, 2023-12-12 Strategic links between Japan and Europe during the Cold War were limited During this period the IISS helped bridge the gap between the two exposing its membership base to the international affairs of Asia and Japan and providing Japanese scholars strategists and diplomats with a platform from which to amplify their voices in the West Analyses by these experts often appeared in IISS publications but the Institute also gained key insights through its well established conferences and lecture series These initiatives illuminated Japanese strategic thinking and perspectives on contemporary critical issues in Japan s and Asia s foreign security and defence policy This Adelphi book through its collection of earlier analysis helps the reader to understand the evolution of Japanese strategic thought from the 1960s until today and shines a light on the continuities and changes in this thinking New original analysis of the material seeks to identify areas where such thinking was prescient and remains relevant to the contemporary strategic environment and other areas where predictions failed or assumptions were proved wrong These new essays were also informed by interviews of Japanese senior scholars and diplomats who spent time with the IISS This book seeks to frame educate and guide strategic thinking on the most pressing issues of today both in and outside

Japan and Asia and will be of great interest to analysts practitioners and students of international affairs

Crowded Orbits James Clay Moltz, 2024-01-30 Space has become increasingly crowded since the turn of the century as a growing number of countries companies and even private citizens have begun operating satellites and become spacefarers Crowded Orbits offers readers a valuable primer on space policy from an international perspective examining technology diplomacy commerce science and military applications This second edition is thoroughly updated to cover events of the decade following the book's original publication in 2014 when the pace of the competition to exploit space has accelerated dramatically James Clay Moltz examines the ongoing tension between competition and cooperation in space tracing the geopolitical and policy consequences of key developments Drawing on decades of experience he considers possible avenues for collaboration among the growing number of actors as well as the forces driving potential space related conflicts Moltz examines the challenges to existing treaties and other governance mechanisms that have struggled to keep up with the spread of technology He provides policy recommendations to enhance international collaboration further scientific exploration and restrain harmful military activities This edition features analysis of a range of topics including the ongoing commercialization of space by SpaceX Planet and other start up companies new capabilities to monitor Earth from space renewed tensions between the United States and rivals China and Russia in military activities and emerging multinational competition on the Moon

Space Law Francis Lyall, Paul B. Larsen, 2024-07-19 As space continues to attract substantial public and private investment and has become ever more active the third edition of this book has been updated to cover recent developments This includes the legal bases of UN Resolution 76 3 the Space3030 Agenda which envisages space as a driver of sustainable development and sets out an extensive programme for the future The work also takes account of adaptations and augmentations to basic space treaties It examines the increasing commercialisation of space in areas such as space tourism and space mining for which four states

have already adopted relevant legislation The impact of new technologies such as satellite constellations and micro satellites are also scrutinised At a time when space tourism is available to those who can afford it and when the moon will shortly be revisited with a prospect of permanent bases this third edition provides a firm base for the next generation of space lawyers As with previous editions the work draws from governmental international organisational and other authoritative sources as well as the relevant literature in the field The book will be an essential and comprehensive resource for students academics and researchers as well as space agencies governments and space active companies It will also be of value to technical operatives and managers who need to know the legal context within which they work
