Un Habitat Report 2008:

State of the World's Cities 2010/11 Un-Habitat, 2010-08-12 The world's urban population now exceeds the world's rural population. What does this mean for the state of our cities given the strain this global demographic shift is placing upon current urban infrastructures? Following on from previous *State of the World's Cities* reports, this edition uses the framework of *The Urban Divide* to analyse the complex social, political, economic and cultural dynamics of urban environments. In particular, the book focuses on the concept of the right to the city and ways in which many urban dwellers are excluded from the advantages of city life, using the framework to explore links among poverty, inequality, slum formation and economic growth. The volume will be essential reading for all professionals and policymakers in the field as well as a valuable resource for researchers and students in all aspects of urban development. Published with UN Habitat. *State of the World's Cities 2012/2013* Un-Habitat, 2013-10-23 The city is the home of prosperity. It is the place where human beings find satisfaction of basic needs and access to essential public goods. The city is also where ambitions, aspirations and other material and immaterial aspects of life are realized, providing contentment and happiness. It is a locus at which the prospects of prosperity and individual and collective well-being can be increased. However, when prosperity is restricted to some groups, when it is used to pursue specific interests or when it is a justification for financial gains for the few to the detriment of the majority, the city becomes the arena where the right to shared prosperity is claimed and fought for. As people in the latter part of 2011 gathered in Cairo's Tahrir Square, in Madrid's Puerta del Sol, in front of London's St Paul's cathedral or in New York's Zuccotti Park, they were not only demanding more equality and inclusion; they were also expressing the need for prosperity to be shared across all segments of society. What this new edition of *State of the World's Cities* shows is that prosperity for all has been compromised by a narrow focus on economic growth. UN Habitat suggests a fresh approach to prosperity beyond the solely economic emphasis, including other vital dimensions such as quality of life, adequate infrastructures, equity and environmental sustainability. The Report proposes a new tool, the City Prosperity Index, together with a conceptual matrix, the Wheel of Prosperity, both of which are meant to assist decision makers to design clear policy interventions. The Report advocates for the need of cities to enhance the public realm, expand public goods and consolidate rights to the commons for all as a way to expand prosperity. This comes in response to the observed trend of enclosing or restricting these goods and commons in enclaves of prosperity or depleting them through unsustainable use. The Report maps out major policy steps to promote a new type of city, the city of the twenty-first century, that is a good, people-centred city. One that is capable of integrating the tangible and more intangible aspects of prosperity and, in the process, shedding off the inefficient, unsustainable forms and functionalities of the city of the previous century. By doing this, UN Habitat plays a pivotal role in ensuring that urban planning, legal, regulatory and institutional frameworks become instruments of prosperity and well-being. *State of the World's Cities 2010/2011*, 2010 One billion people worldwide live in slums and that figure is predicted to

reach 2 billion by 2030 This new volume from UN HABITAT unpacks the complex social and economic issues using the novel conceptual framework of the urban divide *Women's Health and the World's Cities* Afaf Ibrahim Meleis, Eugenie L. Birch, Susan M. Wachter, 2011-08-19 Growing urbanization affects women and men in fundamentally different ways but the relationship between gender and city environments has been ignored or misunderstood Women and men play different roles frequent different public areas and face different health risks Women suffer disproportionately from disease injury and violence because their access to resources is often more limited than that of their male counterparts Yet when women are healthy and safe so are their families and communities Urban policy makers and public health professionals need to understand how conditions in densely populated places can help or harm the well being of women in order to serve this large segment of humanity *Women's Health and the World's Cities* illuminates the intersection of gender health and urban environments This collection of essays examines the impact of urban living on the physical and psychological states of women and girls in Africa Asia Latin America and the United States Urban planners scholars medical practitioners and activists present original research and compelling ideas They consider the specific needs of subpopulations of urban women and evaluate strategies for designing spaces services and infrastructure in ways that promote women's health *Women's Health and the World's Cities* provides urban planners and public health care providers with on the ground examples of projects and policies that have changed women's lives for the better

Resilient Urban Regeneration in Informal Settlements in the Tropics Oscar Carracedo García-Villalba, 2020-09-15 This book focuses on the implementation of slum upgrading projects and the last generation of citywide programmes that define the future urban configuration of informal settlements from a citywide perspective in the Earth's tropical region The book presents a study on regeneration experiences in Asia and Latin America and it identifies important points of connection and similarities between the two cases while also determining that compared to Asia informality in Latin America is in its second generation *Cities, Slums and Gender in the Global South* Sylvia Chant, Cathy McIlwaine, 2015-12-22 Developing regions are set to account for the vast majority of future urban growth and women and girls will become the majority inhabitants of these locations in the Global South This is one of the first books to detail the challenges facing poorer segments of the female population who commonly reside in slums It explores the variegated disadvantages of urban poverty and slum dwelling from a gender perspective This book revolves around conceptualisation of the gender urban slum interface which explains key elements to understanding women's experiences in slum environments It has a specific focus on the ways in which gender inequalities are can be entrenched but also alleviated Included is a review of the demographic factors which are increasingly making cities everywhere feminised spaces such as increased rural urban migration among women demographic ageing and rising proportions of female headed households in urban areas Discussions focus in particular on education paid and unpaid work access to land property and urban services violence intra urban mobility and political participation and representation This book will be of use to

Amaratunga, Richard Haigh, 2011-06-13 Disasters threaten all parts of the world and they appear to be increasing in frequency scale and intensity. Despite huge improvements in the emergency response, permanent reconstruction is often uncoordinated, inefficiently managed and slow to begin. International agencies are geared to an efficient response in terms of humanitarian relief but they are not well versed in the requirements of long term reconstruction which is often constrained by lack of planning and poorly coordinated management. The construction industry is typically engaged in a range of critical activities after a disaster including provision of temporary shelter in the immediate aftermath and restoration of permanent shelter and public infrastructure once the immediate humanitarian needs have been attended to. *Post Disaster Reconstruction of the Built Environment* identifies the challenges that face the industry and highlights best practice to enable the construction industry to address those problems which make an effective response to these unexpected events difficult. Written by an international team of experts, this book will help researchers and advanced students of construction understand the problems faced by communities and the construction industry when faced with a natural or man made disaster and identify the planning and management processes required by the industry to mount an effective response.

Multinationals and Economic Geography Simona Iammarino, Philip McCann, 2013-01-01 The world economy is subject to a rapidly increasing globalization and multinational enterprises are their major driving force. This brand new book on multinationals and economic geography by two world leading economic geographers is a landmark that provides an integrated and dynamic perspective on the economic geography of the multinational enterprise. To fully understand this process of globalization, the book explains forcefully and persuasively that one needs a dynamic perspective on multinational enterprises that brings together disparate literatures on economic geography, knowledge and innovation, global network cities and international business and management. Embedding it in modern theory of innovation and geography, the book provides not only a state of the art of theories and empirics on the location of multinationals but goes far beyond that. This book is an absolute must read for any scholar and any student that is interested in multinationals and their location. Ron Boschma, Utrecht University, The Netherlands and Lund University, Sweden. Despite often playing second fiddle to clusters in the economic geography literature, multinationals are fundamental drivers of economic development. As generators and diffusers of knowledge, they have played an essential role in shaping the new world economic order. No book captures this better than Simona Iammarino and Philip McCann's *Multinationals and Economic Geography*, a must read for anyone eager to fully understand the new economic geography of globalisation. Andr s Rodr guez Pose, London School of Economics, UK. After more than fifty years of systematic research on multinational enterprises (MNEs), what is apparent is that there is as yet no unified or dominant theory of the MNE. The objective of this book is to bring into focus one particular dimension of MNE behaviour and activity that has been relatively under researched, namely the geography of the multinational enterprise as understood through the lens of innovation and technological change. The authors clearly demonstrate that geography is becoming

increasingly important for MNEs and in turn MNEs are becoming progressively more important for economic geography. The pivot on which this vital relationship turns is the creation, diffusion and management of new knowledge. This unique book will prove a fascinating read for academics, students and researchers across a broad range of areas including geography, economic geography, regional science, international business and management, innovation studies, economic development. Professionals such as corporate managers and policymakers in these fields would also find this book to be of great interest.

Global Shift, Sixth Edition Peter Dicken, 2011-02-25. Widely adopted throughout the world, this definitive text comprehensively examines how the global economy works and its effects on people and places. Peter Dicken provides a balanced yet critical analysis of globalization processes and debates. The text synthesizes a wealth of data on production, distribution, consumption and innovation, including detailed case studies of key global industries. Students learn how the global economic map is being shaped and reshaped by dynamic interactions among transnational corporations, states, consumers, labor and civil society organizations. Useful features include nearly 250 quick reference figures and tables. The companion website offers PowerPoint slides of the figures and tables, additional case studies and questions, annotated Web links and more. New to This Edition: Revised throughout to incorporate the latest ideas in the field; gives increased attention to global production networks as a major organizing principle; Addresses the current global financial crisis; Chapter on environmental impacts of global production networks; Case study chapter on the extractive industries; Fully updated empirical data, additional maps and charts.

Urbanization and Socio-Economic Development in Africa Steve

Kayizzi-Mugerwa, Abebe Shimeles, Nadège Désirée Yaméogo, 2014-05-16. The main goal of this book is to put urbanization and its challenges squarely on Africa's development agenda. Planned urbanization can improve living conditions for the majority, help in the expansion of the middle class and create conditions for economic transformation. However, many African cities have developed haphazardly, resulting in the decline of public services, slum proliferation and increases in poverty. African cities thrive on activities characterized by easy entry and low productivity, generally referred to as the informal sector. Indeed, today some urban dwellers are poorer than their cousins in the countryside. In spite of reform attempts, many governments have not been able to create an enabling environment with adequate infrastructure and institutions to sustain markets for easy exchange and production. This study argues that with careful policies and planning, the situation can be changed. If the recent natural resource led economic boom that we have seen in many African countries is used for structural reforms and urban renewal, African cities could become centers of economic opportunity. The challenge for African policymakers is to ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment, hence green growth.

How Asia Can Shape the World J. Ørstrøm Møller, 2011. Asia will redraw the map of economic progress over the next twenty-five years. Growth is necessary to solve economic and social problems but harder to achieve as the age of plenty gives way to the age of scarcities. The challenge opens the doors for an Asian economic model based on

shifting of productivity for the individual to groups ecological productivity instead of economic productivity and a reversal to traditional Asian values less materialistic than Western values A new paradigm for economic thinking emerges to replace the one launched in the West 200 years ago
