Patterson, 2018-03 A timely inquiry into how domestic politics and global health governance interact in Africa Global health campaigns development aid programs and disaster relief groups have been criticized for falling into colonialist patterns running roughshod over the local structure and authority of the countries in which they work Far from powerless however African states play complex roles in health policy design and implementation In *Africa and Global Health Governance* Amy S. Patterson focuses on AIDS the 2014 2015 Ebola outbreak and noncommunicable diseases to demonstrate why and how African states accept challenge or remain ambivalent toward global health policies structures and norms Employing in depth analysis of media reports and global health data Patterson also relies on interviews and focus group discussions to give voice to the various agents operating within African health care systems including donor representatives state officials NGOs community based groups health activists and patients Showing the variety within broader patterns this clearly written book demonstrates that Africa's role in global health governance is dynamic and not without agency Patterson shows how for example African leaders engage with international groups attempting to maintain their own leadership while securing the aid their people need Her findings will benefit health and development practitioners scholars and students of global health governance and African politics State, Foreign Operations, and Related Programs Appropriations for 2012 United States. State, Foreign Operations, and Related Programs Appropriations for 2012: Testimony of members of Congress; testimony of interested individuals and organizations United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2011 **Uganda Operational Plan Report Fy 2013** United States United States Department of State, 2014-11-12 In September 2012 the Ministry of Health MOH released the results of the Uganda AIDS Indicator Survey UAIS 2011 which indicated that Uganda continues to experience a severe HIV epidemic HIV prevalence in the general population 15 to 59 years old is estimated to be 7.3% in 2011 compared to 6.4% in 2004.5 HIV prevalence is higher among women 8.3% than among men 6.1% Compared to the 2004.5 UAIS survey the magnitude of change in HIV prevalence varied across regions Central Western Southwestern and

Northern regions remain the worst affected while modest declines in prevalence were recorded in the East Central and Mid Eastern regions. Of particular concern is the rise in HIV prevalence among young people aged 15-24 years generally and in all age groups specifically in the West Nile and North East regions that previously were least affected. UNAIDS projects the number of new annual infections at 150 000 in 2011, an increase from 120 000 in 2004. AIDS mortality is estimated at 62 000 deaths in 2011, the lowest estimate in a long decline since 2000, reflecting the significant expansion of ART. The UNAIDS most recent World AIDS Day Report warned of increasing unprotected sex, both sexes and multiple partners, women. The estimated number of people infected with HIV has risen to 1.39 million, 55% of whom are female and 14% are children under the age of 15 years. HIV is predominantly heterosexually transmitted, accounting for 75-80% of new infections. However, population subgroups show that the most affected and the risk factors and drivers of HIV infections have evolved in recent years. Studies show an HIV prevalence of 1.2% in university students, 15.40% in fishing communities, 37% among sex workers, 18% in the partners of sex workers and 13% in the group of men with a history of having sex with men. Strikingly, 35% of new infections occur amongst self-reported monogamous individuals, which raises concerns regarding rising multiple concurrent partnerships. The remaining transmissions are largely due to mother-to-child HIV transmission. In response to the 2011 UNAIDS results, PEPFAR revised its programmatic and technical approaches and targets to better respond to Uganda's escalating epidemic. The 2013 COP is based on scientific evidence, prioritized proven interventions, resources matched effectively across subpopulations and efforts directed towards sources of new infections to assist the HIV/AIDS epidemic response in Uganda. The 2013 COP is the product of a consultative process that involved the GOU, PEPFAR, implementing partners, IP and bilateral and multilateral donors.

Investing in Reproductive, Maternal, Newborn, Child, and Adolescent Health in Uganda Elizabeth Asege Ekochu, Julia Mensah, Rogers Ayiko, Stephen Kitembe Kiirya, Brendan Michael Hayes, Collins Chansa, Richard Crabbe, Grace Murindwa, Marc DeFrancis, 2024-03-22. In Uganda, conditions in reproductive, maternal, newborn, child and adolescent health (RMNCAH) remain the primary drivers of morbidity and mortality, accounting for 60 percent of years of life lost. The high burden of these conditions can be attributed to a poor quality of care resulting from inadequate financial, human and material resources, compounded by weak multisectoral coordination. Moreover, the country's high population growth rate and a young population imply that RMNCAH service delivery will continue to dominate health sector reforms, even with the increasing prevalence of noncommunicable and infectious diseases. Over the past two decades, Uganda has focused on improving the quality of RMNCAH service delivery, leading to declines in the maternal, infant and

under five mortality ratios and the increased use of modern contraception among married women However the neonatal mortality and teenage pregnancy rates have stagnated and the low civil registration of births and deaths remains challenging Investing in Reproductive Maternal Newborn Child and Adolescent Health in Uganda What Have We Learned and Where Do We Go from Here comprises 12 studies conducted as part of the RMNCAH Operational Research Program drafted between 2019 and 2021 and finalized and disseminated in October 2022 across 45 districts of Uganda with funding from Sweden and the World Bank These studies underscore important lessons learned and offer suggestions for enhancing the delivery of RMNCAH interventions Each chapter represents one study and discusses service delivery the health workforce financing health information systems and governance and leadership Two appendixes summarize key findings and recommendations and explain the roles of key stakeholders in the RMNCAH Operational Research Program **Global education monitoring report, 2019** UNESCO,2018-12-03 The Report examines the education impact of migration and displacement across all population movements within and across borders voluntary and forced for employment and education It also reviews progress on education in the 2030 Agenda for Sustainable Development In view of increasing diversity the report analyses how education can build inclusive societies and help people move beyond tolerance and learn to live together

Sub-Saharan Africa Ms.Janet Gale Stotsky,Ms.Lisa Kolovich,Suhaib Kebhaj,2016-07-28 Gender budgeting is an initiative to use fiscal policy and administration to address gender inequality and women s advancement A large number of sub Saharan African countries have adopted gender budgeting Two countries that have achieved notable success in their efforts are Uganda and Rwanda both of which have integrated gender oriented goals into budget policies programs and processes in fundamental ways Other countries have made more limited progress in introducing gender budgeting into their budget making Leadership by the ministry of finance is critical for enduring effects although nongovernmental organizations and parliamentary bodies in sub Saharan Africa play an essential role in advocating for gender budgeting **Public Investment Plan** Uganda,Uganda.
