Un Monde Sans Wall Street:

The Implosion of Contemporary Capitalism Samir Amin, 2013-09-01 Renowned political economist Samir Amin engaged in a unique lifelong effort both to narrate and affect the human condition on a global scale brings his analysis up to the present the world of 2013 The key events of our times financial crisis the emerging nations globalization financialization political Islam Euro zone implosion are related in a coherent historically based account Changes in contemporary capitalism require an updating of definitions and analysis of social classes class struggles political parties social movements and the ideological forms in which they express their modes of action in the transformation of societies Amin meets this challenge and lays bare the reality of monopoly capitalism in its general global form Ultimately Amin demonstrates that this system is not viable and that the implosion in progress is unavoidable Whether humanity will rise to the challenge of building a more humane global order free of the contradictions of capital however is yet to be seen *Contradictions* Paul Zarembka, 2013-05-09 Bringing together renowned political economy scholars this volume analyzes two decisive factors in the world spread of capitalism a shift toward dominance of the financial sector global wage differentials so deep that recognition of a labor aristocracy cannot be avoided **Legalizing Theft** Alain Deneault, 2018-06-11 T00:00:00Z When our infrastructures deteriorate when social benefits are frozen when our living conditions are precarious it is because of tax havens A source of growing inequalities and colossal tax losses the use of tax havens by large corporations and wealthy individuals explains the increasingly popular austerity policies of governments in the West With formidable efficacy and clarity and in the wake of the Paradise Papers leak Alain Deneault raises the political questions behind of this legalized theft What are the consequences of tax havens How do we counter the private sovereignty thus conferred on the powerful As taxpayers shoulder the social and financial burdens while corporations hide billions in off shore tax havens Deneault identifies the urgent need to put an end to this legalized theft , *Socially Responsible Capitalism and Management* Henri Savall, Michel Péron, Véronique Zardet, Marc Bonnet, 2017-08-15 In the current crisis context capitalism is questioned by its detractors or defended by its partisans The concept of Socially Responsible Capitalism SRC is based on the entrepreneurial spirit It encourages exemplary behaviors such as effective efficient and ethical behaviors by stimulating social responsibility of companies and organizations This is combined with the development of economic empowerment and legitimate efforts of each citizen actor Socially Responsible Capitalism and Management does not confuse financial capitalism and entrepreneurial capitalism The first one improves the creation of artificial value which leads to financial bubbles that periodically burst and bankrupt the real economy Quite the reverse entrepreneurial capitalism creates both solid economic value and employment This is justified by the production of goods and services that meet legitimate needs of consumer citizens This book shows that by putting Human Beings at the heart of action enables producing sustainable economic value and anthropological values which are inseparable The innovative aspect of this book lies in its analysis starting from the macro economic level to the individual one by presenting a

detailed analysis of the micro economic level of companies within its managerial issues Socially Responsible Capitalism and Management is dedicated to present the different aspects of SRC for the Society companies and organizations and also individual actors as citizens producers and consumers *The Implosion of Capitalism* Samir Amin, 2013-11-08 In *The Implosion of Capitalism* world renowned political economist Samir Amin connects the key events of our times financial crisis Eurozone implosion the emerging BRIC nations and the rise of political Islam identifying them as symptoms of a profound systemic crisis In light of these major crises and tensions Amin updates and modifies the classical definitions of social classes political parties social movements and ideology In doing so he exposes the reality of monopoly capitalism in its contemporary global form In a bravura conclusion Amin argues that the current capitalist system is not viable and that implosion is unavoidable *The Implosion of Capitalism* makes clear the stark choices facing humanity and the urgent need for a more humane global order *The Marx Through Lacan Vocabulary* Christina Soto van der Plas, Edgar Miguel

Juárez-Salazar, Carlos Gómez Camarena, David Pavón-Cuéllar, 2022-04-24 This text explores a set of key concepts in Marxist theory as developed and read by Lacan demonstrating links and connections between Marxist thought and Lacanian practice The book examines the complexity of these encounters through the structure of a comprehensive vocabulary which covers diverse areas from capitalism and communism to history ideology politics work and family Offering new perspectives on these concepts in psychoanalysis as well as in the fields of political and critical theory the book brings together contributions from a range of international experts to demonstrate the dynamic relationship between Marx and Lacan as well as illuminating untranslatable points which may offer productive tension between the two The entries trace the trajectory of Lacan's appropriation of Marx's concepts and analyses how they were questioned criticized and reworked by Lacan accounting for the wide reach of two thinkers and worlds in constant homology Each entry also discusses psychoanalytic debates relating to the concept and seeks to refine the clinical scope of Marx's work demonstrating its impact on the social and individual dimensions of Lacanian clinical practice With a practical and structured approach *The Marx through Lacan Vocabulary* will appeal to psychoanalysts and researchers in a range of fields including political science cultural studies and philosophy **Finance Capital Today** François Chesnais, 2016-09-07 *Finance Capital Today* is shortlisted for the The Isaac and Tamara Deutscher Memorial Prize 2017 *Finance Capital Today* presents a rich new analysis of the specific features of contemporary capitalism notably its truly global nature and its financialisation calling on Marxist analyses of the concentration centralisation and globalisation of capital and Marx's theory of interest bearing and fictitious capital Chesnais shows how financial globalisation and the exponential growth of financial assets have developed alongside the globalisation of productive capital paying special attention to the contemporary operations of transnational corporations and global oligopoly He argues that the macroeconomic perspective is one in which large amounts of capital are looking for profitable investment in a setting of underlying overproduction and low profits The outcome will be low global growth repeated
