The Metamorphoses of the Self John M. Dunaway,2021-12-14 American writer Julien Green's 1900-1998 origins artistic motivation and identity was a source of mystery and confusion even for those that most followed him The first non-French national to be elected to the Académie française Green authored several novels The Dark Journey The Closed Garden Moira Each Man in His Darkness and the Dixie trilogy a four volume autobiography The Green Paradise The War at Sixteen Love in America and Restless Youth and his famous Diary In this study John M Dunaway begins with an examination of the autobiographical context of Julien Green's works in which the duality of mystic and sensualist is quite clearly polarized He then proceeds through a selected series of Green's fictional works in an attempt to show the birth and nature of the third self as a personal myth of the artist He then considers the fiction in chronological order with the intention of demonstrating the evolution of the myth of the third self in Green's career

The First Law of Mechanics in General Relativity & Isochrone Orbits in Newtonian Gravity Paul Ramond,2023-04-30 The thesis tackles two distinct problems of great interest in gravitational mechanics one relativistic and one Newtonian The relativistic one is concerned with the first law of binary mechanics a remarkably simple variational relation that plays a crucial role in the modern understanding of the gravitational two body problem thereby contributing to the effort to detect gravitational wave signals from binary systems of black holes and neutron stars The work reported in the thesis provides a mathematically elegant extension of previous results to compact objects that carry spin angular momentum and quadrupolar deformations which more accurately represent astrophysical bodies than mere point particles The

Newtonian problem is concerned with the isochrone problem of celestial mechanics namely the determination of the set of radial potentials whose bounded orbits have a radial period independent of the angular momentum The thesis solves this problem completely in a geometrical way and explores its consequence on a variety of levels in particular with a complete characterisation of isochrone orbits The thesis is exceptional in the breadth of its scope and achievements It is clearly and eloquently written makes excellent use of images provides careful explanations of the concepts and calculations and it conveys the author's personality in a way that is rare in scientific writing while never sacrificing academic rigor

The Trial of John Peltier, Esq., for a Libel Against Napoleon Buonaparté, First Consul of the French Republic, at the Court of Kings Bench, ... 21 February 1803, 1803 **The Sacred Willow** Mai Elliott, 2000-04-20 A finalist for the Pulitzer Prize Duong Van Mai Elliott's *The Sacred Willow* illuminates recent Vietnamese history by weaving together the stories of the lives of four generations of her family Beginning with her great grandfather who rose from rural poverty to become an influential landowner and continuing to the present Mai Elliott traces her family's journey through an era of tumultuous change She tells us of childhood hours in her grandmother's silk shop and of hiding while French troops torched her village watching while blossoms torn by fire from the trees flutter like hundreds of butterflies overhead She makes clear the agonizing choices that split Vietnamese families her eldest sister left her staunchly anti communist home to join the Viet Minh and spent months sleeping in jungle camps with her infant son fearing air raids by day and tigers by night And she follows several family members through the last desperate hours of the fall of Saigon including one nephew who tried to escape by grabbing the skid of a departing American helicopter Based on family papers dozens of interviews and a wealth of other research this is not only a memorable family saga but a record of how the Vietnamese themselves have experienced their times
