Scientific Journal Impact Factor 23:

Scientific Journals Tony Stankus, 1990 Suggests to librarians how to create a good collection of scientific journals keeping tabs on the industry and finding acceptable alternatives to the expensive European publications Annotation copyright Book News Inc Portla Or *Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis* Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrop rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences **Science Dynamics and Research Production** Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the

characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative

Springer Handbook of Science and Technology Indicators Wolfgang Glänzel, Henk F. Moed, Ulrich Schmoch, Mike Thelwall, 2019-10-30 This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system Focusing on various aspects of the development and application of indicators derived from data on scholarly publications patents and electronic communications the individual chapters written by leading experts discuss theoretical and methodological issues illustrate applications highlight their policy context and relevance and point to future research directions A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources presenting both traditional and advanced approaches It addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society It also presents and critically discusses various national research evaluation systems Complementing the sections reflecting on the science system the technology section includes multiple chapters that explain different aspects of patent statistics patent classification and database search methods to retrieve patent related information In addition it examines the relevance of trademarks and standards as additional technological indicators The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance

Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011

The Matter of Facts Gareth Leng, Rhodri Ivor Leng, 2020-03-18 How biases the desire for a good narrative reliance on citation metrics and other problems undermine confidence in modern science Modern science is built on experimental evidence yet scientists are often very selective in deciding what evidence to use and tend to disagree about how to interpret it In *The Matter of Facts* Gareth and Rhodri Leng explore how scientists produce and use evidence They do so to contextualize an array of problems confronting modern science that have raised concerns about its reliability the widespread use of inappropriate statistical tests a shortage of replication studies and a bias in both publishing and citing positive results Before these problems can be addressed meaningfully the authors argue we must understand what makes science work and what leads it astray The myth of science is that scientists constantly challenge their own thinking But in reality all scientists are in the business of persuading other scientists of the importance of their own ideas and they do so by

combining reason with rhetoric Often they look for evidence that will support their ideas not for evidence that might contradict them often they present evidence in a way that makes it appear to be supportive and often they ignore inconvenient evidence In a series of essays focusing on controversies disputes and discoveries the authors vividly portray science as a human activity driven by passion as well as by reason By analyzing the fluidity of scientific concepts and the dynamic and unpredictable development of scientific fields the authors paint a picture of modern science and the pressures it faces Publish or Perish Imad A. Moosa,2018-01-26 Imad Moosa s thought provoking book explores the contemporary doctrine that plagues the academic sphere the principle of publish or perish This book identifies the pressures placed upon academics to either publish their work regularly or suffer the consequences including lack of promotion or even redundancy

Developments in Management Science in Engineering 2018 Jiuping Xu,2020-01-17 Management science in engineering MSE is playing an increasingly important role in modern society In particular the development of efficient and innovative managerial tools has significantly influenced the research progress of management science in engineering This book identifies the main research categories of MSE and evaluates and classifies each journal in this field It has been developed through the joint efforts of scientific board members many of whom are editors in chief of significant journals academics and members and fellows of various relevant societies It will be of interest to scientists researchers practitioners engineers graduate students and upper level undergraduates in engineering management civil engineering industrial engineering environmental engineering energy engineering information engineering and agricultural engineering

Measuring Research Cassidy R. Sugimoto,Vincent Larivière,2018 Policy makers academic administrators scholars and members of the public are clamoring for indicators of the value and reach of research The question of how to quantify the impact and importance of research and scholarly output from the publication of books and journal articles to the indexing of citations and tweets is a critical one in predicting innovation and in deciding what sorts of research is supported and whom is hired to carry it out There is a wide set of data and tools available for measuring research but they are often used in crude ways and each have their own limitations and internal logics **Measuring Research What Everyone Needs to Know** R will provide for the first time an accessible account of the methods used to gather and analyze data on research output and impact Following a brief history of scholarly communication and its measurement from traditional peer review to crowdsourced review on the social web the book will look at the classification of knowledge and academic disciplines the differences between citations and references the role of peer review national research evaluation exercises the tools used to measure research the many different types of measurement indicators and how to measure interdisciplinarity The book also addresses emerging issues within scholarly communication including whether or not measurement promotes a publish or perish culture fraud in research or citation cartels It will also look at the stakeholders behind these analytical tools the adverse effects of these quantifications and the future of research measurement Encyclopedia of Library and Information

Science Allen Kent,2001-11-02 This is the 70th encyclopaedia of library and information science It covers topics such as intelligent systems for problem analysis in organizations interactive system design international models of school library development lexicalization in natural language generation and more **Cumulated Index Medicus** ,1996 Editorial and authorial voices in EFL academic journal publishing Roger Nunn,John Adamson,2012 This volume of work is intended as a natural successor to *Accepting alternative voices in EFL journal articles* Nunn Adamson 2009 in which we looked into the possibilities of challenging the standard evaluation criteria and review procedure for EFL journal submissions to the Asian EFL Journal Continuing this exploration into issues impacting upon academic publishing in EFL chapters 2 6 pursue the issue of authorial voice where there seems to be an increasing consensus that a first person voice has a legitimate role beyond the humanities field In chapters 7 to 9 the focus shifts to the wider perspectives of the journal reviewer or editor as researcher exploring issues which directly shape their academic world views This is an essential step in recognizing that research is necessary to both raise awareness of journal staff about authorial voice in publishing especially those of non Anglophone scholars and also about how reviewers and editors construct their own identity how they perceive their responsibilities and how they position the journals for which they work John Adamson Comprehensive Remote Sensing Shunlin Liang,2017-11-08 *Comprehensive Remote Sensing* Nine Volume Set covers all aspects of the topic with each volume edited by well known scientists and contributed to by frontier researchers It is a comprehensive resource that will benefit both students and researchers who want to further their understanding in this discipline The field of remote sensing has quadrupled in size in the past two decades and increasingly draws in individuals working in a diverse set of disciplines ranging from geographers oceanographers and meteorologists to physicists and computer scientists Researchers from a variety of backgrounds are now accessing remote sensing data creating an urgent need for a one stop reference work that can comprehensively document the development of remote sensing from the basic principles modeling and practical algorithms to various applications Fully comprehensive coverage of this rapidly growing discipline giving readers a detailed overview of all aspects of Remote Sensing principles and applications Contains Layered content with each article beginning with the basics and then moving on to more complex concepts Ideal for advanced undergraduates and academic researchers Includes case studies that illustrate the practical application of remote sensing principles further enhancing understanding

Demystifying Scholarly Metrics Marc W. Vinyard,Jaimie Beth Colvin,2022-02-25 *Demystifying Scholarly Metrics* gives librarians and faculty the confidence to navigate the maze of scholarly metrics identify quality journals in which to publish and measure the impact of scholarly works Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics This user friendly book demystifies them helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact Several controversies exist in the scholarly metrics landscape

including a disagreement between the proponents of altmetrics and traditional bibliometrics Even more contentious debates are breaking out over predatory journals and open access publishing Authors Mark Vinyard and Jaimie Beth Colvin who successfully launched a faculty publishing initiative explain which aspects of metrics are truly essential to grasp and they place these numbers in context They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape Evaluating Scholarship and Research Impact Jeffrey W. Alstete, Nicholas J. Beutell, John P. Meyer, 2018-06-26 This book probes the dynamics of academic research and scholarship evaluation Readers will learn about scholarly metric evolution impact factors disruptive technologies and a myriad of forces affecting policy development at institutions through an examination of widely used measurements and growing concerns about their influence **Index Medicus**, 2004 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings *European Science Editing*, 2002 Experimental Physics Walter F. Smith, 2020-03-18 This textbook provides the knowledge and skills needed for thorough understanding of the most important methods and ways of thinking in experimental physics The reader learns to design assemble and debug apparatus to use it to take meaningful data and to think carefully about the story told by the data Key Features Efficiently helps students grow into independent experimentalists through a combination of structured yet thought provoking and challenging exercises student designed experiments and guided but open ended exploration Provides solid coverage of fundamental background information explained clearly for undergraduates such as ground loops optical alignment techniques scientific communication and data acquisition using LabVIEW Python or Arduino Features carefully designed lab experiences to teach fundamentals including analog electronics and low noise measurements digital electronics microcontrollers FPGAs computer interfacing optics vacuum techniques and particle detection methods Offers a broad range of advanced experiments for each major area of physics from condensed matter to particle physics Also provides clear guidance for student development of projects not included here Provides a detailed Instructor s Manual for every lab so that the instructor can confidently teach labs outside their own research area **Handbook Bibliometrics** Rafael Ball, 2020-12-07 Bibliometrics and altmetrics are increasingly becoming the focus of interest in the context of research evaluation The Handbook Bibliometrics provides a comprehensive introduction to quantifying scientific output in addition to a historical derivation individual indicators institutions application perspectives and data bases Furthermore application scenarios training and qualification on bibliometrics and their implications are considered *Creating the Academic Commons* Thomas H. P. Gould, 2011-06-14 Today s library is still at the heart of all university activities helping students and faculty become better learners teachers and researchers In recent years there has emerged the formalizing of one or more of these activities into an Academic Commons These centers of information have been labeled variously but they all share a commonality the empowerment of students and teachers In *Creating the Academic Commons Guidelines for Learning Teaching and Research* Thomas Gould

gives a detailed outline of the various roles and activities that take place in commons located within the administrative umbrella of the library Gould provides a roadmap for libraries seeking to establish their own Academic Commons complete with suggestions regarding physical structure and software hardware options And to ensure new ideas are examined evaluated and adopted broadly Gould shows how the Millennial Librarian can be at the center of this evolutionary library Including information regarding the latest technological advances this book will be an invaluable guide for librarians
