Document 1: Models

Ptolemy Geocentric Model Copernicus Heliocentric Model

Observe the two models above.

What is the major difference you notice between the two?

Why do you think people were initially reluctant to accept the theory presented by Copernicus?

Document 2: Informational Passage

In the early 1500s, Copernicus served in a variety of roles for the Catholic Church, where he developed economic theories and legislation. Astronomy became the more than a hobby for Copernicus, a career without professional title. By 1514, however, Copernicus became so convinced of the theory of a heliocentric (sun-centered) solar system that he began to share his notes with friends. Ten years after his 50th birthday, Copernicus published a book. He was ready to deliver an official book about 1540, the book was finally published. The book was revolutionary in its content. In the book, Copernicus explained that the sun was at the center of the universe, and the planets (Mercury, Venus, Earth, Mars, Jupiter, Saturn) orbited the sun. He also argued that the distance to the sun was much less than the distance from the sun to the planets. Copernicus died a year later, in 1542.

Document 3: Cartoon titled "Galileo describes his discoveries to the Church" by Chris Madden

Background Information: The Catholic Church supported Aristotle's theory that the moon and stars were made of pure and perfect substances. He also said they were perfect spheres.

Why do you think the Church supported this claim?

Take a close look at the cartoon. How did Galileo's image of the moon differ from the Church's view?

Why do you think the Pope is hitting Galileo over the head with his telescope?
