Scientism The New Orthodoxy:

Scientism: The New Orthodoxy Richard N. Williams, Daniel N. Robinson, 2014-11-20 Scientism The New Orthodoxy is a comprehensive philosophical overview of the question of scientism discussing the role and place of science in the humanities religion and the social sciences Clarifying and defining the key terms in play in discussions of scientism this collection identifies the dimensions that differentiate science from scientism Leading scholars appraise the means available to science covering the impact of the neurosciences and the new challenges it presents for the law and the self Illustrating the effect of scientism on the social sciences and the humanities Scientism the New Orthodoxy addresses what science is and what it is not This provocative collection is an important contribution to the social sciences and the humanities in the 21st century Contributors include Peter Hacker Bastiaan van Fraassen Daniel N Robinson Kenneth Schaffner Roger Scruton James K A Smith Richard Swinburne Lawrence Principe and Richard N Williams [The Psychoanalytic Understanding of Consciousness, Free Will, Language, and Reason](#) Robert Samuels, 2023-05-08 The Psychoanalytic Understanding of Consciousness Free Will Language and Reason examines the ways in which we can use psychoanalysis in order to better understand humanity and explores the question of what makes us human For thousands of years thinkers have been trying to define what makes us human Some of the main questions they have asked is What is consciousness Do we have free will Do animals use language And what does reason mean Samuels argues that we need to better understand the psychoanalytic approach to human nature in order to answer these questions as well as using it to provide a new way of understanding issues such as addiction political conflict ideology and destructive personal relationship This book will be of vital interest to psychotherapists as well as students and researchers across the fields of psychoanalysis philosophy and psychology

[Values in Psychological Science](#) Lisa Osbeck, 2019 Science values and persons Observing Imaginative sense making Perspective taking **An Interdisciplinary Approach to the Human Mind** Line Joranger, 2018-10-11 One of the main aims of modern mental health care is to understand a person s explicit and implicit ways of thinking and acting So it may seem like the ultimate paradox that mental health care services are currently overflowing with brain concepts belonging to the external visible brain world and that neuroscientists are poised to become new experts on human conduct An Interdisciplinary Approach to the Human Mind shows that to create care that is truly innovative mental health care workers must not only ask questions about how their conceptions of human beings and psychological phenomena came into being but should also see themselves as co creators of the mystery they seek to solve Looking at the human being as a being with a biological body and unique subjective experiences living in a reciprocal relationship with its sociocultural and historical environment the book will provide examples and theories that show the necessity of an innovating interdisciplinary mental health care service that manages to adapt its theory and methods to environmental biological and subjective changes To this end the book will provide an innovating psychology that offers a broad kaleidoscope of perspectives about the relations

between the history of psychology as a scientific discipline oriented to interpret and explain subject and subjectivity phenomenon and the social construction of subjectified experience This unique and timely book should be of great interest to critical and cultural psychologists and theorists clinical psychologists therapists and psychiatrists sociologists of culture and science anthropologists philosophers historians and scholars working with social and health theories It should also be essential reading for lawyers advocates and defenders of human rights The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781315309682> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 licence

The Observer and the Observed Chris Steed, 2024-11-05 This book approaches the God question in a different way than normal from the perspective of psychotherapy In a world of machine intelligence the key idea is an analogy of being between human personhood and divine personhood as the only satisfactory way of showing that our inner conscious awareness nourished by the validation of the self is responded to in ultimate terms It aims to extrapolate from below from our psychological experience to asking ultimate questions drawing lines between Observation in quantum physics The maternal gaze Recognition in social worlds that confer perception in place of invisibility The power of intersubjectivity in relational neurobiology and therapy What has to be accounted for is our sense of personhood and how that fits in with a cosmos that is at best neutral The metaphor of a wifi universe is proposed but rather than a soulless device being switched on how a human psyche comes to a sense of consciousness of its own value is the issue here A personal God is the best explanation for the evidence of how our personhood and subject status requires correspondence As engaging with a neutral AI entity is bound to be soulless the first person perspective requires an I-thou relationship A universe constructed from nature by itself or one where the ultimate is impersonal energy just does not cut it or respond adequately to what is inside us This book offers an account of how the realm described by physics and our inner world can tie up perhaps the only way they can

Science, Religion, and the Protestant Tradition James C. Ungureanu, 2019-10-03 The story of the conflict thesis between science and religion the notion of perennial conflict or warfare between the two is part of our modern self understanding As the story goes John William Draper 1811-1882 and Andrew Dickson White 1832-1918 constructed dramatic narratives in the nineteenth century that cast religion as the relentless enemy of scientific progress And yet despite its resilience in popular culture historians today have largely debunked the conflict thesis Unravelling its origins James Ungureanu argues that Draper and White actually hoped their narratives would preserve religious belief For them science was ultimately a scapegoat for a much larger and more important argument dating back to the Protestant Reformation where one theological tradition was pitted against another a more progressive liberal and diffusive Christianity against a more traditional conservative and orthodox Christianity By the mid nineteenth century narratives of conflict between science and religion were largely deployed between contending theological schools of thought However these narratives were later appropriated by secularists freethinkers and atheists as weapons against all religion By revisiting its origins development and

popularization Ungureanu ultimately reveals that the conflict thesis was just one of the many unintended consequences of the Protestant Reformation

A History of Existential Psychology Zoltán Kőváry, 2024-12-30 The first in a two part set this book takes a deep dive into the history and theory of existential psychology Beginning with a discussion of the existentialism and psychology problem the book presents the philosophical and historical roots of existential psychology It introduces the most important philosophical schools in the development of existentialism and their creators such as Kierkegaard Nietzsche Heidegger and Sartre as well as the literary roots of existentialism in the writings of Dostoevsky and Kafka and the important contribution of psychoanalysis and phenomenological psychiatry The book then goes on to look at the existential psychology schools including daseinsanalysis logotherapy and existential analysis the existential humanistic school and the existential phenomenological school Going beyond the questions of therapy and counseling that typically make up the study of existential psychology the book offers the ultimate introduction for students and scholars of this fascinating and deeply rooted discipline It may also interest professionals working in related fields

The Foundations of Philosophy Michael Pol Macneil, 2025-06-03 This work is about philosophy and what makes a philosophy distinctively Christian in character arguing that it is indeed possible for philosophy to be conceived of as first Christian and not just philosophy done by people that happen to be Christians Christian philosophy is epistemologically self conscious philosophy conducted in a manner honoring to the revelation of the Hebrew and Christian scriptures It is argued that philosophy should be transformative rather than just therapeutic or elucidatory The author examines competing philosophical and scientific accounts from both the empiricist and rationalist schools arguing they are coherent and successful only to the degree that they have imported consciously or unconsciously Christian transcendentalism He then applies this insight to explore the character and practice of a Christian political philosophy

Sculpting the Self Muhammad Umar Faruque, 2021-08-17 Sculpting the Self addresses what it means to be human in a secular post Enlightenment world by exploring notions of self and subjectivity in Islamic and non Islamic philosophical and mystical thought Weaving together insights from several disciplines such as religious studies philosophy anthropology critical theory and neuroscience and arguing against views that narrowly restrict the self to a set of cognitive functions and abilities this study proposes a multidimensional account of the self that offers new options for addressing central issues in the contemporary world including spirituality human flourishing and meaning to life

Religion, Supernaturalism, the Paranormal and Pseudoscience Homayun Sidky, 2019-11-30 Religion Supernaturalism the Paranormal and Pseudoscience provides a comprehensive rejoinder to the challenges posed to science scientific anthropology evolutionary theory and rationality by the advocates of supernatural paranormal and pseudoscientific perspectives and modes of thought associated with the current rise of irrationalism antiintellectualism and emboldened religious fundamentalism and violence Drawing upon H Sidky's scientific anthropological background and ethnographic field research of supernatural and paranormal beliefs and practices in several cultures over three decades the book answers

several important questions Why do humans have a proclivity for the supernatural and paranormal thinking Why has humanity remained shackled to sets of ideas inherited from a violent past that have no basis in reality and which bestow an illusionary solace promote bloodshed endless cruelties and fervent hatreds and have come at a high cost Why have ancient superstitions been held as sacred inviolate truths while other aspects of the archaic belief systems of which they were a part have long been discarded Why have not humans outgrown religion and paranormal beliefs

The Neurology of Religion Alasdair Coles, Joanna Collicutt, Joanna Collicutt McGrath, 2019-11-07 Examines what can be learnt about the brain mechanisms underlying religious practice from studying people with neurological disorders

Theology And Science: From Genesis To Astrobiology Joseph Seckbach, Richard Gordon, 2018-12-06 The age old debate between science and faith invites more players to the fore in this book Proponents of the origin of life as a natural process and natural selection as a mechanism of evolution come face to face with advocates for the intervention of a creator while other scholars believe that the gulf between science and religion should be bridged At turns disconcerting revelatory and profound readers are invited to leave their preconceived notions at the door and join these writers in this curious journey of discovery

The Anthem Companion to Auguste Comte Andrew Wernick, 2017-05-15 For most of the twentieth century Auguste Comte a controversial but highly influential nineteenth century figure and his vast treatises on positive philosophy politics and religion were disregarded and largely ignored More recently however Comte s life and writings have been reexamined together with the project of social reform to which his intellectual labors were devoted producing a much more complicated picture of his thought and its significance The Anthem Companion to Auguste Comte with ten new critical essays by leading Comte scholars sociologists intellectual historians social theorists and philosophers aims to further this reexamination while also providing a multifaceted introduction to Comte s thought and to current discussion about him The essays also examine Comte s relation to a multiplicity of other thinkers and his place more generally in the formation and legacy of modern Western thought

Science and Anthropology in a Post-Truth World H. Sidky, 2020-11-12 At the end of 2019 Americans were living in an era of post truth characterized by fake news weaponized lies alternative facts conspiracy theories magical thinking and irrationalism While many complex interconnected factors were at work this post truth era was partly the culmination of a cadre of anthropologists and other academics in American universities and colleges during the 1980 s and 1990 s In *Science and Anthropology in a Post Truth World* H Sidky examines how their untoward dalliance with problematic and dangerous ideas by Michel Foucault Jacques Derrida Jean Fran ois Lyotard Bruno Latour and Jean Baudrillard informed and empowered a forceful assault on science and truth in the following decades by corporate organizations politicians religious extremists and right wing populists

The Regulation of Medical Products Penny Gleeson, 2024-12-31 This book develops a theoretical framework for examining and assessing the regulatory arrangements for medical products Since the first half of the 20th century the regulation of pharmaceuticals medical devices and more recently biologicals have been controlled in many

jurisdictions by specific regulatory regimes and agencies Their regulatory mandates are similar to ensure the quality safety and efficacy of medical products This book provides a timely and relevant assessment of the complexities of medical regulatory regimes by drawing on a particular theory of political legitimacy In this respect the book adopts a dialogic approach according to which a shared set of normative beliefs and values are formulated as a theoretical tool to identify deficiencies in the regulatory arrangements for medical products Drawing on several Australian cases studies characterised by divergent normative perspectives the book develops its dialogic approach in order to challenge the usual legitimization of regulatory regimes from the perspective of science alone Specifically it maintains that such regimes need to embrace a normative pluralism that admits a diversity of types and sources of knowledge This evaluation of the increasingly influential domain of medical regulation will appeal to a range of scholars and practitioners working in law public health politics and science and technology studies

The Essence of History Aaron Turner, 2025-09-25 This book brings together historical thinkers from diverse disciplinary backgrounds to offer original interpretations of the essence of history It addresses why the essence of history itself cannot be so easily thematised or conceptualised Restating the question of the essence of history is necessary as it has been largely forgotten today Since antiquity history has been inextricably bound up with the problem of truth Contemporary philosophy of history and historiography have branched out in many different directions This complexity has made it nearly impossible for historical thinkers to engage outside of their own field The relentless advancement of historical thought has almost completely neglected the question of the essence of history The chapters in this volume respond to questions such as What is history What in the progress of historical thought from antiquity to modernity did we lose along the way And what does it mean if it means anything at all to have history to be historical The Essence of History will be of interest to scholars and graduate students working in philosophy of history historical theory and historiography and ancient history

Good Science Joshua W. Clegg, 2022-01-20 This is a refreshing account of psychological science that focuses on moral responsibility collective commitment and justice

Certainty in Action Danièle Moyal-Sharrock, 2021-03-25 In *Certainty in Action* Dani le Moyal Sharrock describes how her encounter with Wittgenstein overturned her previous assumptions that the mind is a product of brain activity and that thought consciousness the will feelings memories knowledge and language are stored and processed in the brain by the brain She shows how Wittgenstein enables us to veer away from this brain centred view of intelligence and behaviour to a person centred view focusing on ways of acting that are both diversely embedded across forms of human life and universally embedded in a single human form of life The book traces the radical importance of action as the cohesive thread weaving through Wittgenstein s philosophy and shows how certainty intertwines with it to produce new ways of engaging in epistemology the philosophy of mind and the philosophy of language This selection of Moyal Sharrock s essays vividly illustrates some of the ways in which Wittgenstein s pioneering enactivism has impacted and can further impact not only philosophy but also neighbouring disciplines such as linguistics psychology

primatology evolutionary psychology and anthropology Certainty in Action is essential reading for students and researchers of these disciplines and for anyone interested in getting a grasp of Wittgenstein s lasting genius and influence A Kaleidoscopic View of Chinese Philosophy of Education Ruyu Hung,2019-12-18 This book breaks the stereotype that links Chinese philosophy solely to Confucianism instead providing a kaleidoscopic view of Chinese philosophy of education The contributors explore a variety of issues including the journey of modernisation or Westernisation of China s education between the sixteenth and twentieth centuries Chinese identity and the concept of race in education and history contemporary interpretations of Confucian pedagogy in relation to twenty first century skills the life story of a teacher in modern China as embodying the spirit of a Confucian pedagogue the ecological self in education an original interpretation of postmodern Daoist symbolism and the role of translation in producing and transmitting knowledge across cultural and linguistic boundaries This book was originally published as a special issue of Educational Philosophy and Theory The Muslim Speaks Khurram Hussain,2020-10-29 The Muslim Speaks reimagines Islam as a strategy for investigating the modern condition Rather than imagining it as an issue external to a discrete West Khurram Hussain constructs Islam as internal to the elaboration and expansion of the West In doing so he reveals three discursive traps that of freedom reason and culture that inhibit the availability of Islam as a feasible critical interlocutor in Western deliberations about moral intellectual and political concerns Through close examination of this inhibition Hussain posits that while Islamophobia is clearly a moral wrong depoliticization more accurately describes the problems associated with the lived experience of Muslims in the West and elsewhere Weaving together his conclusions in the hope of a common world Khurram Hussain boldy and quite radically deems that what Islam needs is not depoliticization but infact repoliticization
