Scop Of Economics Final 2014:

Country Experiences in Economic Development, Management and Entrepreneurship Mehmet Huseyin Bilgin,Hakan Danis,Ender Demir,Ugur Can,2016-11-09 This volume brings together selected papers from the 17th EBES Conference organized in Venice in winter 2015 The theoretical and empirical papers present the latest research in diverse areas of business economics and finance from many different regions They chiefly focus on the interactions between economic development entrepreneurship and financial institutions especially putting the spotlight on cross country evidence Topics range from women s entrepreneurship and economic regulation to sustainability and climate change This book provides researchers professionals and students a great opportunity to catch up on the latest studies in different fields and empirical findings on many countries and regions Mobile Payments, Consumer Policy, and the Law Nwanneka

Ezechukwu,2023-03-17 Mobile technology offers an innovative and cost effective channel for delivering a range of financial services including mobile payments In some jurisdictions mobile payments simply provide a convenient option for facilitating payment transactions In other jurisdictions mobile payments are viewed as potentially transformative because they present an opportunity to expand access to financial services However as with other innovations mobile payments raise consumer protection concerns and require robust regulatory mechanisms to address such concerns Against this backdrop the book adopts a typology of consumer policy tools which can be used to address the identified consumer concerns This typology guides the enquiry into the existing consumer protection frameworks applying to mobile payments in selected jurisdictions Canada Kenya and the United Kingdom The main objective of this endeavour is to identify best practices that national authorities seeking to leverage mobile payments and similar innovations can emulate This book will be of interest to policymakers regulators industry stakeholders students and scholars interested in the regulation of innovative financial services particularly from a consumer protection perspective **Economic Evaluation in Education** Henry M.

Levin,Patrick J. McEwan,Clive Belfield,A. Brooks Bowden,Robert Shand,2017-06-15 The past decade has seen increased attention to cost effectiveness and benefit cost analysis in education as administrators are being asked to accomplish more with the same or even fewer resources philanthropists are keen to calculate their return on investment in social programs and the general public is increasingly scrutinizing how resources are allocated to schools and colleges This text titled Cost Effectiveness Analysis in its previous editions is the only full length book to provide readers with the step by step methods they need to plan and implement a benefit cost analysis in education The authors examine a range of issues including how to identify measure and distribute costs how to measure effectiveness utility and benefits and how to incorporate cost evaluations into the decision making process The updates to the Third Edition reflect the considerable methodological development in the evaluation literature and the greater empiricism practiced by education researchers to help readers learn to apply more advanced methods to their own analyses SAGE congratulates author Henry M Levin winner of the 2017 AERA

Distinguished Contributions to Research in Education Award *The Economic Crisis in Social and Institutional Context*
 Sebastiano Fadda, Pasquale Tridico, 2015-02-20 This book explores the foundations of the current economic crisis Offering a heterodox approach to interpretation it examines the policies implemented before and during the crisis and the main institutions that shaped the model of advanced economies particularly in the last two decades The first part of the book provides a theoretical analysis of the crisis The roots of the great recession are divided into fundamentals with origins in financial liberalisation financial innovation and income distribution and complementary or contributory factors such as the international imbalances the monetary policy and the role of credit rating agencies Part II suggests various paths to recovery while emphasising that it will be necessary to develop alternative strategies for sustainable economic recovery and growth These strategies will require genuine political support and a new great European vision to address major issues concerning the EU such as unemployment structural regional differences and federalism Drawing on various schools of thought this book explains the complexities of the crisis through a wider evolutionary institutional and heterodox framework Mega-Regional Trade Agreements Thilo Rensmann, 2017-07-20 This book provides an in depth analysis of Mega Regionals the new generation of trans regional free trade agreements FTAs currently under negotiation and their effect on the future of international economic law The main focus centres on the EU US Transatlantic Trade and Investment Partnership TTIP the Trans Pacific Partnership TPP and the EU Canada Comprehensive Economic and Trade Agreement CETA but the findings are also applicable to similar agreements under negotiation such as the Regional Comprehensive Economic Partnership RCEP The specific features of Mega Regional Trade Agreements raise a number of issues with respect to their potential effect on the current system of international trade and investment law These include the consequences of Mega Regionals for the most favoured nation MFN principle their relation to the multilateral system of the World Trade Organization WTO their democratic legitimacy and their interaction with existing bilateral investment treaties BITs The book is intended for academics and practitioners working in the field of international economic law **The Pluralist Character of the European Economic Constitution** Clemens Kaupa, 2016-08-25 This monograph intervenes in the long standing and controversial debate on the socio economic orientation of the European Union Arguing that the European economic constitution is pluralist in the sense that it does not favour any specific socio economic paradigm it shows that European law allows the pursuit of very different regulatory projects by the European and the national legislators This pluralist character of the European economic constitution stands in an uncomfortable relationship with the policies currently pursued by the European Union which are often neoliberal in their orientation The book takes an interdisciplinary approach it analyses the Treaty on the Functioning of the European Union as interpreted and developed in the case law of the Court of Justice its history and its regulatory purpose in the light of conflicting socio economic paradigms By challenging the orthodoxy the book makes a bold proposition that will likely resonate in both European economic law scholarship and European law in general

With the ongoing economic crisis triggering a significant interest in economic questions among legal scholars it is particularly timely and topical

Routledge International Handbook of Complexity Economics Ping Chen, Wolfram Elsner, Andreas Pyka, 2024-11-29 The Routledge International Handbook of Complexity Economics covers the historical developments and early concerns of complexity theorists and brings them into engagement with the world today In this volume a distinguished group of international scholars explore the state of the art of complexity economics and how it may deliver new and relevant insights to the challenges of the 21st century Complexity science started in 1899 when Henri Poincaré described the three body problem The first approaches in economics emerged somewhat later in the 1980s driven by the Brussels Austin school Since then complexity economics has gone through numerous developments departing from linear simplifications applying physical algorithms to evolutionary economics and big data This book covers the basic principles and methods and offers an overview of the various domains ranging from diverse fields of productivity studies agricultural economics to monetary economics as well as the current challenges such as climate change epidemics and economic inequality where complexity economics can provide insight It closes with a review of complexity political economy and policy Offering a vibrant alternative to orthodox economics this handbook is a crucial resource for advanced students researchers and economists across the disciplines of heterodox economics economic theory and econophysics

The Road Ahead for America's Colleges and Universities Robert B. Archibald, David H. Feldman, 2017-07-03 The US higher education system is on the verge of a revolution so some observers claim Archibald and Feldman leading analysts provide an incisive overview of the challenges facing and possibilities for America's universities and colleges in their training future generations And they demonstrate that our higher education system is resilient and adaptable enough to weather the internal external and technological threats without changing campuses beyond recognition The Road Ahead for America's Colleges and Universities examines the threats posed to the current health of higher education by rising tuition and falling government support as well as from new digital technologies rippling through the entire economy Some predict disaster pointing to high costs exploding debt and a digital tsunami that supposedly will combine to disrupt and sweep away many of the nation's higher education institutions or change them beyond recognition Archibald and Feldman provide a more nuanced view They argue that the bundle of services that four year colleges and universities provide will retain its value for the traditional age range of college students Less certain Archibald and Feldman argue is whether the system will continue to be a force for social and economic opportunity The threats are most dire at schools that disproportionately serve America's most underprivileged students At the same time growing income inequality reduces the ability of many students and their families to pay for higher education Archibald and

Feldman suggest a range of policy options at the state and federal level that will help America s higher education system continue to fulfill its promise

Forestry for a low-carbon future Food and Agriculture Organization of the United Nations,2016 Forests are critical to mitigation having a dual role they function globally as a carbon sink but are also responsible for about 10 to 12 percent of global emissions Forests and forest products offer both developing and developing countries with a wide range of options for timely and cost effective mitigation Afforestation reforestation offers the best option because of its short timescale and ease of implementation Reducing deforestation especially due to the possibility for immediate action Yet forest contributions to mitigation Wood products and wood energy can replace fossil intense products in other sectors creating a virtuous cycle towards low carbon economies The mitigation potential and costs of the various options differ greatly by activity region system boundaries and time horizon Policymakers must decide on the optimal mix of options adapted to local circumstances for meeting national climate change and development goals This publication assesses the options and highlights the enabling conditions opportunities and potential bottlenecks It will be supported by policymakers investors and investors in their climate strategies This publication assesses the options and highlights the enabling conditions opportunities and potential bottlenecks It will be supported by policymakers investors and investors in their climate strategies This publication assesses the options and highlights the enabling conditions opportunities and potential bottlenecks It will be supported by policymakers investors and investors in their climate strategies

The Political Economy of International Law Alberta Fabbriotti,2016-06-24 Set in the context of growing interdisciplinarity in legal research The Political Economy of International Law A European Perspective provides a much needed systematic and coherent review of the interactions between Political Economy and International Law The book reflects the need felt by international lawyers to open their traditional frontiers to insights from other disciplines and political economy in particular The methodological approach of the book is to take the traditional list of topics for a general treatise of international law and to systematically incorporate insights from political economy to each

Innovation and the Entrepreneurial University Dirk Meissner,Erkan Erdil,Joanna Chataway,2018-03-26 The book explores different approaches towards the entrepreneurial university paradigm explores channels and mechanism used by universities to implement the paradigm and contributes to the public discussion on the impact of commercialization on university research and knowledge It argues that different types of university industry interaction may have repercussions even on funding of basic research if an appropriate balance is ensured between the two University activities both research and education in all forms should provide economic and social relevance directed towards open science and open innovation This book adds value to current knowledge by presenting both a conceptual framework and case studies which describe different contexts

What Is Enlightenment? Mohammed D. Cherkaoui,2016-04-11 Political sociology has struggled with predicting the next turn of transformation in the MENA countries after the 2011 Uprisings Arab activists did not articulate explicitly any modalities of their desired system although

their slogans ushered to a fully democratic society These unguided Uprisings showcase an open ended freedom to question after Arabs underwent their freedom from struggle from authoritarianism The new conflicts in Egypt Syria Yemen and Libya have fragmented shar iya legitimacy into distinct conceptualizations revolutionary legitimacy electoral legitimacy legitimacy of the street and consensual legitimacy This volume examines whether the Uprisings would introduce a replica of the European Enlightenment or rather stimulate an Arab Islamic awakening with its own cultural specificity and political philosophy By placing Immanuel Kant in Tahrir Square this book adopts a comparative analysis of two enlightenment projects one Arab still under construction with possible progression toward modernity or regression toward neo authoritarianism and one European shaped by the past two centuries Mohammed D Cherkaoui and the contributing authors use a hybrid theoretical framework drawing on three tanwiri enlightenment philosophers from different eras Ibn Rushd known in the west as Averroes the twelfth century Immanuel Kant the eighteenth century and Mohamed Abed Al Jabri the twentieth century The authors propose a few projections about the outcome of the competition between an Islamocracy vision and what Cherkaoui terms as a Demoslamic vision since it implies the Islamist movements flexibility to reconcile their religious absolutism with the prerequisites of liberal democracy This book also traces the patterns of change which point to a possible Arab Axial Age It ends with the trials of modernity and tradition in Tunisia and an imaginary speech Kant would deliver at the Tunisian Parliament after those vibrant debates of the new constitution in 2014

Research Handbook on the Economics of Intellectual Property Law Ben Depoorter, Peter Menell, David Schwartz, 2019 Both law and economics and intellectual property law have expanded dramatically in tandem over recent decades This field defining two volume Handbook featuring the leading legal empirical and law and economics scholars studying intellectual property rights provides wide ranging and in depth analysis both of the economic theory underpinning intellectual property law and the use of analytical methods to study it

Energy Law and Economics Klaus Mathis, Bruce R. Huber, 2018-04-19 This book offers an edited volume for all readers who wish to gain an in depth grasp of the economic analysis of recent developments in energy law and policy in Europe and the United States In response to waning resources and heightened environmental awareness many countries are now seeking to redefine their energy mix Several energy sources are available coal and oil natural gas and a variety of renewables Yet which of them are capable of addressing core energy related concerns Reliability security affordability fairness and sustainability all have to be taken into account Further once a target mix has been identified two challenges remain for legal scholars what role does the law play in achieving a specified energy mix and how can the law best fulfill that role The essential energy concerns are just as important in defining the way we shape our energy mix as they are in defining the mix itself An example of current challenges in energy law and policy can be seen in the pursuit by the German and Swiss governments of the so called Energiewende energy transition These policies are intended to enable the transition from a non sustainable use of fossil and nuclear energy to a more sustainable approach based on renewable

energies On the one hand the goal is to achieve a decarbonization of the energy economy by reducing the use of fossil energy sources such as petroleum carbon and natural gas On the other and in response to the Fukushima nuclear accident a phase out is intended to eliminate the dangers of nuclear technologies Achieving these goals poses tremendous challenges for the two countries energy policies partly because the energy transition will not only affect energy production but also energy consumption From a Law and Economics perspective a number of questions arise to what extent is it justifiable to rely on markets and continued technological innovation especially with regard to the present exploitation of scarce resources To what extent is it necessary for states to intervene in energy markets Regulatory instruments are available to create and maintain more sustainable societies command and control regulations restraints Pigovian taxes emission certificates nudging policies and more If regulation in a certain legal field is necessary which policies and methods will most effectively spur the sustainable consumption and production of energy in order to protect the environment while mitigating any potential negative impacts on economic development Do neoclassical and behavioural economics provide us with a suitable framework for predicting the market s complex reactions to a changing energy policy This book provides theoretical insights as well as empirical findings in order to answer these vital questions

Unified Patent Protection in Europe Winfried

Tilmann, Clemens Plassmann, 2018-07-04 The creation of the Unified Patent Court UPC is the most prominent change in the European legal landscape for the last four decades This book explains how the new system works in practice and how to make the best use of its provisions It offers readers an in depth and comprehensive commentary on the legal mechanisms of the upcoming ratified European Patent Law and advice on potential problems that users of the forthcoming regulations may face The book first describes the creation of the Unified European Patent Law and how its four new legislative texts interact The new legislative texts are then explained and commented on in detail rule by rule with diverse approaches and perspectives from a practitioner team comprising patent litigators European patent attorneys law professors and patent judges The Commentary takes into account the practical needs of users of the new system on both the prosecution and enforcement sides addressing substantive and procedural problems This book is the most authoritative text on the Unitary Patent and Unified Patents Court and an invaluable tool for practitioners in this rapidly developing area of law

The Routledge International Handbook of Economic Sociology Milan Zafirovski, 2023-05-12 This handbook presents a systematic and comprehensive overview of economic sociology an exemplary interdisciplinary field which draws on theoretical frameworks and empirical findings from both economics and sociology to present a unique lens on the interdependence of the economy and society The handbook is arranged in four parts which together present the current state of the art of economic sociology as well as pointing toward future directions for research The first part outlines the theoretical foundations of economic sociology and its relations to other fields particularly with regard to other alternative approaches to economics and looks at conceptions and definitions of economic sociology vary The second part provides an

overview of the historical development of economic sociology from classical political economy to the present day The third part explores the main problematics of economic sociology analyzing the economy in relation to particular social institutions the state ideology culture and art religion gender race ethnicity and more The fourth part focuses on the principal branches including sociology of the market industrial organization and work uncertainty distribution and inequality money and finance and the environment The stellar international cast of contributors is drawn from both economics and sociology therefore presenting a holistic view of the field and contributing to a rejuvenation of economic sociology within economics It is an indispensable reference work for researchers and students across a broad range of sociological and economic disciplines

Implications of Industry 5.0 on Environmental Sustainability Sajid, Muhammad Jawad, Khan, Syed Abdul Rehman, Yu, Zhang, 2022-12-29 Most businesses are still grappling with the definition and implementation of Industry 4.0 but there is already discussion of the next industrial revolution The coexistence of two industrial revolutions raises problems necessitating debate and clarification In particular the implications of Industry 5.0 on environmental sustainability need to be studied Implications of Industry 5.0 on Environmental Sustainability discusses the little known environmental sustainability implications of the Fifth Industrial Revolution and contributes to the limited knowledge on this topic by considering the various challenges and opportunities Covering key topics such as circular economy robotics renewable energy and waste materials this reference work is ideal for policymakers business owners managers environmental economists industry professionals researchers scholars practitioners academicians instructors and students

OECD Yearbook 2017 Bridging the Divides OECD, 2019-04-25 Bridging Divides is the theme of OECD Forum 2017 After many years of global interaction exchange and progress driven by a potent mixture of reform economic transition emerging markets and technological innovation divisions have again begun to erupt in OECD countries Some of these income

Routledge Handbook of Sport and Legacy Richard Holt, Dino Ruta, 2015-03-02 What remains of a great sporting spectacle after the last race is run or the final match is played How can the vast expense of mounting such events be justified What if there is nothing left behind or what if the legacy is negative a costly infrastructure which is unused or a debt ridden host city The Routledge Handbook of Sport and Legacy addresses perhaps the most important issue in the hosting of major contemporary sporting events the problem of legacy It offers a rigorous innovative and comparative insight into this contested concept from interdisciplinary and practical perspectives Major events must now have a conscious credible and defined policy for legacy to meet public expectations The book provides a comprehensive survey of the various kinds of legacy that can be delivered as well as a close examination of the potential benefits and practical challenges involved in each From hard legacies such as stadia and infrastructure to soft legacies including skill development attitude change and capacity building the book offers both a historical case study and an innovative strategic management approach and establishes the limits of what can realistically be achieved in terms of economic social cultural physical and sporting development The Routledge Handbook of Sport and

Legacy includes contributions from world leading scholars and practitioners and features detailed case studies of major sports events from around the world including the FIFA World Cup and ten Olympics Games from London in 1908 to London 2012 It is invaluable reading for students and researchers working in sport studies events management human geography economics or planning and an essential reference for any professional engaged in delivering legacy through sport
