The Economics of Resource Allocation in Health Care Andrea Klonschinski,2016-03-31 The question of how to allocate scarce medical resources has become an important public policy issue in recent decades Cost utility analysis is the most commonly used method for determining the allocation of these resources but this book counters the argument that overcoming its inherent imbalances is simply a question of implementing methodological changes The Economics of Resource Allocation in Health Care represents the first comprehensive analysis of equity weighting in health care resource allocation that offers a fundamental critique of its basic framework It offers a critique of health economics putting the discourse on economic evaluation into its broader socio political context Such an approach broadens the debate on fairness in health economics and ties it in with deeper rooted problems in moral philosophy Ultimately this interdisciplinary study calls for the adoption of a fundamentally different paradigm to address the distribution of scarce medical resources This book will be of interest to policy makers health care professionals and post graduate students looking to broaden their understanding of the economics of the health care system

Patent Settlements in the Pharmaceutical Industry under US Antitrust and EU Competition Law Amalia Athanasiadou, 2018-08-14 Reverse payment settlements or pay for delay agreements between originators and generic drug manufacturers create heated debates regarding the balance

between competition and intellectual property law These settlements touch upon sensitive issues such as timely generic entry and access to affordable pharmaceuticals and also the need to preserve innovation incentives for originators and to strengthen the pipeline of life saving pharmaceuticals This book is one of the first to critically and comparatively analyse how such patent settlements and various other strategies employed by the pharmaceutical industry are scrutinised by both United States US and European courts and enforcement authorities and to discuss the applicable legal tests and the main criteria used for their assessment The book s ultimate objective is to provide guidance to the pharmaceutical industry regarding the types of patent settlements strategies and conduct which may be problematic from US antitrust and European Union EU competition law perspectives and to assist practitioners in structuring settlements which are both efficient and compliant To this end an exhaustive legal analysis of some of the most controversial issues regarding pharmaceutical patent settlements is provided including the lengthy split among US Circuit Courts on the issue of pay for delay settlements its resolution by the US Supreme Court in *FTC v Actavis* and subsequent jurisprudence the decision of *Lundbeck v Commission* by the European General Court and the *Servier* decision of the European Commission the *Roche Novartis* decision of the European Court of Justice and the most important decisions by National Competition Authorities on pharma patent settlements in the EU an overview of other types of strategies such as product hopping and product reformulations no authorised generic commitments problematic side deals mechanisms affecting generic substitution the rejection of the scope of the patent test in both the US and the EU and the balancing of patent law and antitrust law considerations in the prevailing applicable tests the benefits of settlements and the main criteria for assessing their legitimacy under US antitrust and EU competition law The analysis provides concrete examples of both illegitimate and legitimate settlements and strategies emphasising on conduct that falls within a grey zone and on the circumstances and criteria under which such conduct could be deemed problematic from an antitrust perspective This book will serve as a valuable guide for pharmaceutical companies wishing to minimise the risk of engaging in conduct that could potentially infringe US antitrust and EU competition law It further aims to save courts and enforcement agencies and also practitioners and academics considerable time and resources by providing an exhaustive analysis of the relevant caselaw with the ultimate goal to increase legal certainty on the most controversial aspects of patent settlements in the pharmaceutical industry

Routledge Handbook of International Education and Development Simon McGrath, Qing Gu, 2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period It is deliberately divergent in its approach recognising the major ideological and epistemological divides that characterise a field that draws on many traditions Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts The Handbook is divided in four parts and book ended by an introduction and a conclusion the latter oriented towards the implications that the volume

has for future research agendas The first part explores major strands of debates about education's place in development theory The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development Part three looks beyond schools to consider early years adult and vocational education but focuses particularly on the return to thinking about higher education's role in development The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries Featuring over thirty chapters written by leading international and interdisciplinary scholars the Routledge Handbook of International Education and Development offers the first comprehensive and forward looking resource for students and scholars

World Economic Outlook, October 2018 International Monetary Fund. Research Dept., 2018-10-09 Global growth for 2018-19 is projected to remain steady at its 2017 level but its pace is less vigorous than projected in April and it has become less balanced Downside risks to global growth have risen in the past six months and the potential for upside surprises has receded Global growth is projected at 3.7 percent for 2018-19 0.2 percentage point lower for both years than forecast in April The downward revision reflects surprises that suppressed activity in early 2018 in some major advanced economies the negative effects of the trade measures implemented or approved between April and mid September as well as a weaker outlook for some key emerging market and developing economies arising from country specific factors tighter financial conditions geopolitical tensions and higher oil import bills The balance of risks to the global growth forecast has shifted to the downside in a context of elevated policy uncertainty Several of the downside risks highlighted in the April 2018 World Economic Outlook WEO such as rising trade barriers and a reversal of capital flows to emerging market economies with weaker fundamentals and higher political risk have become more pronounced or have partially materialized Meanwhile the potential for upside surprises has receded given the tightening of financial conditions in some parts of the world higher trade costs slow implementation of reforms recommended in the past and waning growth momentum
