Science and Religion Yves Gingras,2017-06-16 Today we hear renewed calls for a dialogue between science and religion why has the old question of the relations between science and religion now returned to the public domain and what is at stake in this debate To answer these questions historian and sociologist of science Yves Gingras retraces the long history of the troubled relationship between science and religion from the condemnation of Galileo for heresy in 1633 until his rehabilitation by John Paul II in 1992 He reconstructs the process of the gradual separation of science from theology and religion showing how God and natural theology became marginalized in the scientific field in the eighteenth and nineteenth centuries In contrast to the dominant trend among historians of science Gingras argues that science and religion are social institutions that give rise to incompatible ways of knowing rooted in different methodologies and forms of knowledge and that there never was and cannot be a genuine dialogue between them Wide ranging and

authoritative this new book on one of the fundamental questions of Western thought will be of great interest to students and scholars of the history of science and of religion as well as to general readers who are intrigued by the new and much publicized conversations about the alleged links between science and religion Life, Re-Scaled Liliane Campos, Pierre-Louis Patoine, 2022-10-11 This edited volume explores new engagements with the life sciences in contemporary fiction poetry comics and performance The gathered case studies investigate how recent creative work reframes the human within microscopic or macroscopic scales from cellular biology to systems ecology and engages with the ethical philosophical and political issues raised by the twenty first century's shifting views of life The collection thus examines literature and performance as spaces that shape our contemporary biological imagination Comprised of thirteen chapters by an international group of academics Life Re Scaled The Biological Imagination in Twenty First Century Literature and Performance engages with four main areas of biological study Invisible scales cells microbes and mycelium Neuro medical imaging and diagnosis Pandemic imaginaries and Ecological scales The authors examine these concepts in emerging forms such as plant theatre climate change art ecofiction and pandemic fiction including the work of Jeff Vandermeer Jon McGregor Jeff Lemire and Extinction Rebellion's Red Rebel Brigade performances This valuable resource moves beyond the biological paradigms that were central to the nineteenth and twentieth centuries to outline the specificity of a contemporary imagination Life Re Scaled is crucial reading for academics scholars and authors alike as it proposes an unprecedented overview of the relationship between literature performance and the life sciences in the twenty first century
