**Behavioral Science & Policy: Volume 2, Issue 1** Craig Fox, Sim B. Sitkin, 2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals, groups and organizations. Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective. *Sri Lanka Education Sector Assessment* Halil Dundar, Benoit Millot, Michelle Riboud, Mari Shoji, Harsha Aturupane, Sangeeta Goyal, Dhushyanth Raju, 2017-06-16. A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school attainment and enrollment rates for several decades. However, it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country. The authors of *Sri Lanka Education Sector Assessment: Achievements, Challenges and Policy Options* offer a thorough review of Sri Lanka's education sector from early childhood education through higher education. With this book, they attempt to answer three questions: How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes and labor market outcomes? How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.
