

GR 10 Paper 1 Life Sciences scope November 2023 (10 November 2023)

Biological terms: Interphase, Anaphase, Metaphase, Telophase, Collenchyma, phloem, Sclerenchyma, Parenchyma, cuticula, Transpirations, stomata, neuron, organic compound, connective tissue, chromatin, chromosome, foramen magnum, axial skeleton, cranium	
Chemistry of life	Cells
Difference between organic and inorganic compounds	Difference between animal cell and plant cell
Examples of organic and inorganic compounds	All the cell organelles and functions/rolls
Monomers of all organic compound	Describe the build of the nucleus, mitochondria, and chloroplast
Elements of all the organic compounds	Investigation: Osmose and diffusion (Look at the apparatus that we use and how to set up this Investigation)
Vitamins A, B, C, D, and E, and there deficiency diseases they can cause	Explain osmose and diffusion
Enzymes	
- Lock and key model	
- Function of enzymes	
Influence of temperature and pH on enzyme action	
Mitosis	Plant tissue
All the phases can identify and give reasons for your answers	Build and function of: Collenchyma, Sclerenchyma, Parenchyma, Phloem, Xylem and stomata
Product of Mitosis	Definition of tissue
Difference between telophase in plant cells and animal cells	
Biological importance of Mitosis	
Cancer: - Uncontrolled cell division and growth: Causes and treatment of cancer	
	Function and build of: Stomata, Xylem, and root hair
	Adaptions of Xylem for movement of water upwards
Animal tissue	Plant organs
Name and identify all the animal tissues and where in the human body are they located.	The labels and functions of the dorsiventral leaf.
Functions of all the animal tissues	Adaptions of the different parts of the leaf
Name all the connective tissues	Definition of an organ
Support and transport in plants	Support in animals
Labels of dicotyledonous stem and root	All the labels of the skeleton
Difference between a dicotyledons root and stem	Where do we find long bones in the skeleton
	Function of the skeleton
Investigation: The rate of transpirations (Potometer)	
The effect of environmental factors on transpiration (Wind, Temperature and Light.)

Scope For Life Science Final Paper 2014:

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S's still strong research oriented innovation system

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk,Kathleen M. Vogel,Amanda Jane Ozin,2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives Rethinking the Concept of Law of Nature Yemima Ben-Menahem,2022-06-13 This book subjects the traditional concept of law of nature to critical examination There are two kinds of reasons that invite this reexamination one deriving from philosophical concerns over the traditional concept the other motivated by theoretical and practical changes in science One of the philosophical worries is that the idiom of law of nature especially when combined with the notion of laws governing individual events and processes is no longer as intelligible as it used to be in the theistic context in which the formulation of laws became central to science The traditional concept is also challenged in various ways by contemporary scientific theories such as quantum

mechanics chaos theory and the general theory of relativity It is no longer clear that there are any universal laws laws do not always guarantee predictability and the border between physical and mathematical considerations is constantly shifting The most difficult challenge perhaps is to come up with a scientific explanation of the origin of laws Wrestling with these intriguing problems the papers in this volume broaden both our understanding of the natural order and our desiderata of scientific explanation

Anecdotal Evidence Sean Cubitt,2020-01-10 Ecocritique is a practice of radical questioning as essential to the critical armoury as feminism and postcolonialism have become Like them it extends beyond judgements about texts with clear ecological themes demonstrating the significance of ecocriticism for any advanced understanding of cultural forms Anecdotal method is ecocritical because it focuses on encounters concentrated moments of crisis when social ordering and ecological forces clash The anecdote s power to produce events meanings and history forms a methodological entry to aesthetic politics Anecdotal Evidence provides an outline of the need for and principles of anecdotal method a case study of eco critical themes in Hollywood films shaped by the Global Financial Crisis and a confrontation with mass image databases of social and streaming media that due to their scale and organisation appear at first immune to anecdotal method Only because the environment has a history is it possible to intervene environmentally Because we continually misrecognise the historical production of environments the first task of ecocritique is to bring our formative concept of ecology into crisis Its final task will be to achieve the good life for everything connected by the historical implication of humans in ecology and ecology in humans No politics can be undertaken in our times except through media ecocritical humanities have a key role in rethinking ecopolitics in the 21st century

Research on Investment Scale and Allocation
Structure of Chinese Higher Education Finance Yongmei Hu, Yipeng Tang, 2021-12-30 Based on a systematic literature review the book aims to forecast the investment scale of Chinese higher education and the allocation structure of different types of higher education institutions in the next decade The authors first introduce the complex setting of Chinese higher education finance including the background and theoretical foundation as well as an in depth literature review Via international comparative data they explore the adequacy and equity of the financial resources By applying quantitative methods such as panel data analysis and time series analysis they forecast the public investment scale in higher education and the allocation structure and proportion among different types of higher education institutions In addition the book investigates the standards of teaching funding and teacher research funding which are considered the main funding resources of Chinese universities and individual teachers As China has become the world's largest country of higher education how to provide adequate and equal funds to meet the increasing demand is of great interest to scholars and policymakers both from China and abroad The book will also appeal to postgraduate students who would like to know the overall status of Chinese higher education finance

Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando, 2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem

irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse
