

1. Given that P is an object moving in a straight line and that the velocity v in m/s, at time t in seconds, is given by
- $v = 4t$ (1)
 - $v = 4t^2$ (2)
 - $v = 4t^3 + 4t$ (3)

The diagram shows the curve $y = 2t^2$ and the points $P(2, 8)$ and $Q(2, 4)$. The point Q lies on the curve and PQ is parallel to the y -axis.

- Express the area, A , of triangle OPQ in terms of t . (2)
 - The point P moves along the x -axis at a constant rate of 100 units per second and Q moves along the curve so that PQ remains parallel to the y -axis.
 - Find the rate at which A is increasing when $t = 2$. (3)
2. (a) Find the first three terms, in ascending powers of x , in the expansion of
- $(1 - x)^2$. (2)
 - $(1 + 3x)^2$. (2)
- (b) Hence find the coefficient of x^2 in the expansion of $[(1 - x)(1 + 3x)]^2$. (2)

3. Relative to the origin O , the position vectors of points A and B are given by

$$\vec{OA} = \begin{pmatrix} 1 \\ 2 \\ -1 \end{pmatrix} \quad \text{and} \quad \vec{OB} = \begin{pmatrix} 2 \\ 1 \\ 1 \end{pmatrix}$$

$$A = \frac{1}{2}bh$$

$$b = (P + 2)$$

$$h = 2P^2$$

$$A = \frac{1}{2}(P + 2)(2P^2)$$

$$= \frac{1}{2}(2P^2 + 4P^2)$$

$$A = P^3 + 2P^2$$

Scope For Maths Paper 2 2014:

Zero Syamal K. Sen, Ravi P. Agarwal, 2015-11-06 Zero indicates the absence of a quantity or a magnitude. It is so deeply rooted in our psyche today that nobody will possibly ask: What is zero? From the beginning of the very creation of life, the feeling of lack of something or the vision of emptiness, void, has been embedded by the creator in all living beings. While recognizing different things as well as the absence of one of these things are easy, it is not so easy to fathom the complete nothingness, viz. the universal void. Although we have a very good understanding of nothingness or equivalently a zero today, our forefathers had devoted countless hours and arrived at the representation and integration of zero and its compatibility not only with all non-zero numbers but also with all conceivable environments only after many painstaking centuries. Zero can be viewed/perceived in two distinct forms: i) as a number in our mundane affairs and ii) as the horrific void or Absolute Reality in the spiritual plane, the ultimate state of mind. Presented are the reasons why zero is a landmark discovery and why it has the potential to conjure up in an intense thinker the dreadful nothingness unlike those of other numbers such as 1, 2, and 3. Described are the representation of zero and its history including its deeper understanding via calculus, its occurrences and various roles in different countries as well as in sciences/engineering along with a stress on the Indian zero that is accepted as the time-invariant, unique, absolute zero. This is followed by the significant distinction between mathematics and computational mathematics and the concerned differences between the unique absolute zero and non-unique relative numerical zeros and their impact and importance in computations on a digital computer. Introduces the history of the value of zero and why it was a landmark discovery. Discusses how zero is used in science and engineering and its use in different countries. Explains how zero affects different mathematics and calculus.

The Philosophy of Mathematics Education

Paul Ernest, Ole Skovsmose, Jean Paul van Bendegem, Maria Bicudo, Roger Miarka, Ladislav Kvasz, Regina Moeller, 2016-07-15 This survey provides a brief and selective overview of research in the philosophy of mathematics education. It asks what makes up the philosophy of mathematics education, what it means, what questions it asks and answers, and what is its overall importance and use. It provides overviews of critical mathematics education and the most relevant modern movements in the philosophy of mathematics. A case study is provided of an emerging research tradition in one country. This is the Hermeneutic strand of research in the philosophy of mathematics education in Brazil. This illustrates one orientation towards research inquiry in the philosophy of mathematics education. It is part of a broader practice of philosophical archaeology: the uncovering of hidden assumptions and buried ideologies within the concepts and methods of research and practice in mathematics education. An extensive bibliography is also included.

Mathematical Finance with Applications Wing-Keung Wong, Xu Guo, Sergio Ortobelli Lozza, 2020-12-07 Mathematical finance plays a vital role in many fields within finance and provides the theories and tools that have been widely used in all areas of finance. Knowledge of mathematics, probability, and statistics is essential to develop finance theories and test their validity through the analysis of empirical real-world data. For

example mathematics probability and statistics could help to develop pricing models for financial assets such as equities bonds currencies and derivative securities *Statutes and Ordinances of the University of Cambridge 2015* University of Cambridge,2015-10-08 The official Statutes and Ordinances of the University of Cambridge Mathematical Challenges For All Roza Leikin,2023-03-17 This book argues that mathematical challenge can be found at any level and at every age and constitutes an essential characteristic of any mathematics classroom aimed at developing the students mathematical knowledge and skills Since each mathematics classroom is heterogeneous with respect to students mathematical potential quality mathematical instruction results from matching the level of mathematical challenge to different students potential Thus effective integration of mathematical challenge in the instructional process is strongly connected to the equity principle of mathematics education In the three sections in this volume readers can find diverse views on mathematical challenges in curriculum and instructional design kinds and variation of mathematically challenging tasks and collections of mathematical problems Evidence based analysis is interwoven with theoretical positions expressed by the authors of the chapters Cognitive social and affective characteristics of challenging mathematical activities are observed and analyzed The volume opens new avenues of research in mathematics education and pose multiple questions about mathematical instruction rich in mathematical challenge for all The authors invite readers to explore and enjoy mathematical challenges at different levels
