This volume explores the challenges of teaching and learning Science Technology Engineering and Mathematics STEM subjects in local languages and local contexts in a range of countries around the world Many countries around the world including African countries have been largely excluded from the transformation that is going on in STEM pedagogy in the USA where the emphasis is on the importance of language choice and the development of English Language Learner ELL STEM subjects in many parts of the world have been taught in a global language mainly English rather than using a local language and local curriculum This creates pedagogical challenges to the teaching of STEM The contributions to this book review evidence and arguments for the teaching of STEM subjects in local languages and several chapters make this case that this should be considered a human right both in national educational programs and in development aid Working across disciplines and domains has the potential to lead to new understanding and the removal of barriers to progress with the ultimate goal of creating solutions to persistent problems in education Cross disciplinary work in science language and literacy has shown much promise and demonstrated the importance of developing language along with disciplinary knowledge This volume provides a deep dive into this topic with articles by several scholars in the field of language in STEM Jaqueline Barber Director of the Learning Design Group at the Lawrence Hall of Science University of California Berkeley USA In an increasingly technological world STEM Education has become a priority on national agendas and in educational institutions Meaningful access to STEM education can enable or hinder young people from gaining entry into the world of work It is against this backdrop that the edited collection Human Rights and Language in STEM Education needs to be welcomed The various chapters tackle the big questions of access and many others This edited collection is required reading for all those working in STEM and for policy makers who tend to see language and STEM as binaries rather than as interdependent Zubeida Desai Professor and Dean of Education University of the Western Cape South Africa This volume by researchers from 10 countries provides a thought and action provoking multidimensional analysis of issues on the dignity of the use of STEM subjects in local education in the perspective of human rights This book is especially recommended to researchers and education policy makers in such areas as STEM Educational Theory and Praxis Human Rights Future sustainable Development Science and Technology Literacy May it inspire similar volumes in today s politically ebullient world Francisco Gomes de Matos Professor Emeritus of Linguistics human linguistic rights scholar Federal University of Pernambuco Recife Brazil Handbook of Research on Classroom Diversity and Inclusive Education Practice Curran, Christina M.,Petersen, Amy J.,2017-05-30 As classrooms are becoming more diverse teachers are now faced with the responsibility of creating an inclusive classroom community As such researching classroom pedagogies and practices is an imperative step in curriculum planning The Handbook of Research on Classroom Diversity and Inclusive Education Practice

Openshaw, Janet Soler, 2007-06-01 *Reading Across International Boundaries* edited by Roger Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about the teaching of reading It sets the educational issues firmly in the context of the social cultural and political dynamics that inform and animate them and give them their meaning It does so by setting out to understand their historical and comparative dimensions Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world More than this however this collection takes us into the realm of international influences It underlines how debates in this area are not simply national but are international and global in their scale Moreover this is the case not only in relation to the broad fabric of policy debate but also in the everyday struggles of pupils parents and teachers in schools classrooms and homes Such an agenda is unsettling and provocative It has the potential to challenge received opinion to hustle preconceptions It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in different localities or even more broadly Most of all it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field but also a major resource when put to good use by policy makers and practitioners as it should surely be Politics of the Administrative Process
